American Academy of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN™

WHAT IS A PRACTICAL PEDIATRICS CME COURSE?

Designed for pediatricians, family physicians, nurse practitioners, physician assistants, nurses, and allied health professionals caring for children, Practical Pediatrics CME Courses feature nationally prominent faculty presenting topics that highlight current issues in pediatrics. Each course combines lectures, interactive seminars, and question-and-answer sessions to allow you the opportunity to interact directly with faculty in solving the problems you encounter in everyday practice.

OBJECTIVES

By attending a Practical Pediatrics CME Course, you will:

- Update your knowledge of clinical issues by reviewing hot topics and recent practical advances for your office.
- Increase your ability to diagnose and manage patients in your practice by analyzing and discussing cases with the faculty and your peers.

WHY YOU SHOULD ATTEND A PRACTICAL PEDIATRICS CME COURSE

- Weekend courses with half-day sessions combine continuing professional development with relaxation and recreation at great destinations.
- Top-quality education and an opportunity to talk directly with expert faculty provide current and practical pediatric information to take back to your office and use right away.
- Interactive, case-based sessions offer expert guidance about situations you encounter in practice.
- Hot-topic discussions cover the latest in pediatric medicine.
- Exhibits displaying the latest publications and health-care products keep you up to date.

FACULTY AND SCHEDULE CHANGES

Faculty and schedule information included in this catalogue is accurate as of September 2013. Faculty and schedules are subject to change to accommodate emergent situations. Visit www.aap.org/livecme for faculty and schedule changes as well as other important updates.

NEW FOR 2014!

- Extend your learning at The Bahamas and Las Vegas courses with specially-priced educational offerings on PediaLink®. See pages 6 and 11 for details.
- Participate in office-based asthma emergency simulations at the Anaheim course. See page 10 for details.

ELECTRONIC COURSE SYLLABUS

In order to provide high quality images and graphics and in the spirit of going green, the syllabus for the 2014 Practical Pediatrics CME Courses will be available to all attendees online for download in advance of the course. The electronic syllabus will contain the presentations for the various educational sessions along with other useful information. You will also be able to take notes directly on the contents using Adobe Reader, in much the same way you would with a printed syllabus.

To accommodate individual learning styles, you can choose to print the syllabus before the course, or you can order a printed copy if you prefer. If you would like to receive a printed copy of the syllabus, simply select that option on the course registration form. Please note that an additional fee of \$50 applies. To be guaranteed receipt of a printed syllabus at the course, you must register by the early bird deadline for the course you will be attending.

Note: For those who have not pre-ordered the printed syllabus, copies may be available for purchase onsite or after the course; however, quantities will be limited, and availability cannot be guaranteed. The price for a printed syllabus ordered onsite or after the course is \$150.

Electrical power for laptop and tablet use will not be available for full-time use by each course attendee throughout the educational sessions. A limited number of power outlets will be available for brief recharging of computers and tablets during the courses.

Each Practical Pediatrics CME Course includes general session lectures and question-and-answer sessions as well as concurrent interactive seminars. Concurrent seminars are repeated each day, giving all course registrants the opportunity to attend three of the concurrent seminars over the course of the activity. See individual course description pages for a list of the concurrent seminars offered at each course and to select those you wish to attend.

In addition to educational sessions, courses feature exhibits, break times, and informal networking opportunities. Planned with plenty of free time for leisure activities, these courses provide a perfect mix of CME and R&R.

For individual brochures, including detailed schedules for each course, go to www.aap.org/livecme and click on the course of interest to you. Individual course schedules can also be requested by calling the AAP Customer Service Center at 866/843-2271.

GENERAL COURSE SCHEDULE

All courses except Breckenridge, Colorado

COURSE EVE

- Hot Topics in ID
Dr Dennehy
- Common GI Problems in Childhood
Dr Hill

Session registrants will participate in chart audits prior to the course to improve their diagnosis and management of reflux and will have the opportunity to earn MOC™ Part 4 points by registering for the EQIPP module on reflux at a special price made available only to seminar participants.

- Interpreting Allergy Tests
Dr Kelso
- Direct Ophthalmoscopy for the Pediatrician:
How to Use One of the Most Powerful
Instruments in Your Office
Dr Lichtenstein
- Musculoskeletal Physical Examination
Dr Phillips
- Life-threatening Pediatric Dermatoses
Dr Treadwell

GENERAL SESSION LECTURE HIGHLIGHTS

- Chronic Abdominal Pain in Childhood: Who Suffers Most, the Patient or Physician?
- Orthopaedic Aspects of Child Abuse
- Skin Manifestations of Collagen Vascular Disorders
- Understanding Strabismus, Amblyopia, and the Meaning of "Lazy Eye"
- What Determines Asthma Control?
- Bone and Joint Infections: New Guidelines for Management

Maximum AMA PRA Category 1 Credits™ for Course: 17.25

This program is accredited for 17.25 NAPNAP CE contact hours of which 3.0 contain pharmacology (Rx) content, (0 related to psychopharmacology), per the National Association of Pediatric Nurse Practitioners (NAPNAP) Continuing Education Guidelines.

For individual course brochures, including detailed schedules for each course, go to www.aap.org/livecme and click on the course of interest to you. Individual course schedules can also be requested by calling the AAP Customer Service Center at 866/843-2271.

Atlantis Paradise Island Resort and Casino

1 Casino Drive
Paradise Island
Nassau, The Bahamas
<http://www.atlantis.com/myevent/2014ppcme1.aspx>
Toll-Free Phone Number: 800/386-4786
Guest Fax Number: 242/363-3524
Use Group Code GAAP214 to register online or by phone.

The Atlantis Paradise Island Resort has multiple resort towers. The AAP special group rates are:
Beach Tower (close to meeting space): \$229
Coral Tower (close to meeting space): \$239
Royal Tower (main signature tower): \$269
Cove (luxury): \$369

The above rates do not include taxes and levies totaling 18% per night. Guests are also responsible to pay three additional fees: a one-time bellman fee charge of \$6 for every guest 12 and older; a \$1.60 per person per night pool/lifeguard fee for every guest 12 years and older; and a \$5 per person per night housekeeping fee. AAP guests are exempt from the additional resort utility service fee. Third and fourth guests, aged 12 and up, will be charged a rate of \$50 per person, per night, plus the applicable resort charges. **The cutoff date for reservations at the group rate is January 24, 2014. Call the hotel directly to make your reservations.**

A limited number of guest rooms have been reserved, and they are assigned based on availability (first-come, first-served). Please be aware that the room block may be filled prior to January 24, 2014; in such a case, neither the group rate nor guest room availability can be guaranteed. The AAP, therefore, recommends that you make your reservations as early as possible.

Meals: The AAP rates do not qualify our guests for any Atlantis meal plan or other offers. While food at the resort can be costly, reasonably priced meals are available at pool and beach-side outlets as well as at several restaurants both on and off the property.

Child Care/Activities: Atlantis has a full child care center. Visit www.atlantis.com for information.

Dining Reservations: Call the dining specialist toll-free at 888/526-0386 for fine dining reservations. Fine dining options fill up well in advance, so it is recommended that you call for reservations as soon as your hotel reservation is confirmed. See hotel policies on cancellations.

Ground Transportation: Taxi service is the preferred option for transportation to/from Nassau International Airport. The cost is approximately \$36 each way. Shuttle service is also available.

Parking: Valet parking (\$10 per day) and self-parking (\$5 per day) are available at this resort.

Travel Documents: See page 14 for information on required travel documents.

Cancellations: Course cancellations must be received in writing by **February 7, 2014** to receive a refund. An administrative charge of \$50 will be deducted.

With the lure of a big city and the ease of a tropical utopia, Nassau and Paradise Island in The Bahamas are considered by many to be, well, paradise. Nassau, the capital of The Bahamas, is a bustling metropolitan hub full of culture and modern amenities. To the north lies Paradise Island, 685 acres of pure euphoria, developed almost exclusively to delight and accommodate visitors. The island has resorts, hotels, restaurants, shops, nightlife, a golf course, an aquarium and a casino. English is spoken here, and American currency is welcome. Paradise Island brings families together, simply because it makes parents begin acting like children themselves. This transformation is easy when you're surrounded by so many things to do as a family—beaches, water parks, snorkeling, dolphins, and trips to an underwater world. Activities on the water include—but are not limited to—diving, swimming with dolphins, fishing, sailing, sunset cruises, kite boarding, and power boating to cays and private islands. For a change of pace, you can visit downtown Nassau for shopping on Bay Street or the Straw Market. Take a horse-and-buggy tour to see historic Balcony House, Pompey Museum, the National Art Gallery, and the changing of the guard at Government House. Then visit Arawak Cay for a genuine Bahamian-style lunch with fresh seafood and cold drinks. For more information, please visit www.bahamas.com.

CONCURRENT SEMINAR SELECTION

You can attend one concurrent seminar each day in the subspecialty of your choice. To allow more informal interaction with the faculty, attendance in each seminar is limited and is offered on a first-come, first served basis. Confirmation of your concurrent seminar registrations will be included in your onsite registration packet.

REGISTRATION

Using your Visa, MasterCard, American Express, or Discover, you can register online at www.aap.org/livecme, fax your registration to 847/228-5059 or 847/434-8757, or call toll-free 866/843-2271. Outside the United States and Canada, call 847/434-4000, option 3.

Please have your credit card and concurrent seminar selections ready prior to calling. If your membership status has changed or lapsed, the registration staff will charge the appropriate fees accordingly.

Educational sessions as well as food and beverages provided during the course are intended for course attendees only. Lodging and meals, other than specified, are not included in the registration fee.

Onsite registrants are welcome if space is available. Availability of course materials cannot be guaranteed for these registrants, however, until after the course.

COMPREHENSIVE COURSE SYLLABUS

As part of your registration, you will have access to electronic course materials containing useful information that supports and augments the educational sessions. See page 2 for complete information about the electronic syllabus as well as options for either downloading or ordering a printed syllabus.

TRAVEL DOCUMENTS

All U.S. citizens are required to present a valid U.S. passport in order to enter or re-enter the United States when travelling by air. U.S. citizens do not need visas for short trips to The Bahamas for tourist/business purposes. It is important to note that, although the Bahamian government only requires proof of citizenship and identity in order to enter The Bahamas, the U.S. government requires that Americans have a valid passport in order to fly home. Most airlines will not permit a U.S. citizen to fly to The Bahamas without a valid U.S. passport and risk getting stranded.

Note: Many countries require that a passport be valid for six months beyond your intended return date.

AIR TRANSPORTATION

The AAP Travel Office is pleased to offer negotiated airline discounts to our CME courses. For complete details call the AAP Travel Office at 888/227-1772, Monday-Friday, 8:00AM-4:30PM CST, to make your travel arrangements. AAP members only may also take advantage of making their travel arrangements online through Concur at www.concursolutions.com.

If you were a nuTravel user:

- Current members that are nuTravel users will automatically have a Concur login.
- The login is your AAP ID number @aap.org.
- Your initial password is changeme. You will change your password once you enter the site.

If you are a new user, or if you find that your login is invalid, contact the AAP Travel Office for help at 888/227-1772. All applicable airline discounts will be taken at the time of ticketing by the AAP travel agency.

CAR RENTAL DISCOUNTS

The AAP Travel Office is offering CME course attendees a reduced car rental rate through Hertz and Avis. Please ask your AAP Travel Agent for details. Hertz can be reached directly at 800/654-2240 or www.hertz.com. The AAP discount code is CV01570018. Avis can be reached at 800/331-1600 or www.avis.com. The AAP discount code is AWD A628999.

SPECIAL NEEDS

The AAP is sensitive to the special needs of its attendees. Please indicate any accommodations on your registration form. Scooter and wheelchair rentals are available by contacting ScootAround, Inc., toll-free at 888/441-7575, by email at info@scootaround.com, through their website at www.scootaround.com, or by fax at 204/478-1172.

CONTINUING MEDICAL EDUCATION CREDIT

The American Academy of Pediatrics (AAP) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

The AAP designates each of these live activities for a maximum of 17.25 *AMA PRA Category 1 Credits™*. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

These activities are acceptable for a maximum of 17.25 AAP credits. These credits can be applied toward the AAP CME/CPD Award available to Fellows and Candidate Members of the AAP.

The American Academy of Physician Assistants (AAPA) accepts certificates of participation for educational activities certified for *AMA PRA Category 1 Credit™* from organizations accredited by ACCME. Physician assistants may receive a maximum of 17.25 hours of Category 1 credit for completing this program.

These live activities, Practical Pediatrics CME Courses, have been reviewed and are acceptable for up to 17.0 Prescribed credits by the American Academy of Family Physicians. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Each of these programs is accredited for 17.25 NAPNAP CE contact hours per the National Association of Pediatric Nurse Practitioners (NAPNAP) Continuing Education Guidelines.

DISCLOSURE OF FINANCIAL RELATIONSHIPS AND RESOLUTION OF CONFLICTS OF INTEREST

The AAP Policy on Disclosure of Financial Relationships and Resolution of Conflicts of Interest is designed to ensure quality, objective, balanced, and scientifically rigorous AAP CME activities. All individuals in a position to influence and/or control the content of AAP CME activities are required to disclose to the AAP and subsequently to learners that they either have no relevant financial relationships or any financial relationships with the manufacturer(s) of any commercial product(s) and/or provider(s) of commercial services discussed in CME activities. All potential conflicts of interest are identified and resolved prior to an individual's confirmation of service at an AAP CME activity. Beyond disclosure of financial relationships, AAP CME faculty are required to disclose to the AAP and to learners when they plan to discuss or demonstrate pharmaceuticals and/or medical devices and/or medical or surgical procedures that involve "off-label" use of a device or pharmaceutical. The AAP is committed to providing learners with commercially unbiased CME activities.

The content of these CME activities does not necessarily reflect the views or policies of the AAP.

CME Credits for Sunday: 5.75

Maximum **AMA PRA Category 1 Credits™** for Course: 17.25

This program is accredited for 17.25 NAPNAP CE contact hours of which 3.0 contain pharmacology (Rx) content, (0.0 related to psychopharmacology), per the National Association of Pediatric Nurse Practitioners (NAPNAP) Continuing Education Guidelines.

The notation of pharmacology (Rx) contact hours is provided for attendees claiming NAPNAP credits.

Learning Objectives

Food Allergy: Is It Something He's Eating?

Learning Objectives: Upon completion of this session, you should be able to: 1) Take a good history for food allergy; 2) Order and interpret appropriate food allergy tests; 3) Advise families on treatment and natural history of food allergies; 4) Recognize non-IgE-mediated adverse reactions to foods; 5) Recognize symptoms of eosinophilic esophagitis; and 6) Provide appropriate advice regarding early introduction of allergenic foods.

What Determines Asthma Control?

Learning Objectives: Upon completion of this session, you should be able to: 1) Describe the difference between asthma severity and asthma control; 2) Assess asthma control at each office visit using symptoms and spirometry; 3) Communicate to patients and families what constitutes good asthma control; and 4) Apply asthma therapy to achieve good asthma control in every child with asthma.

Drug Allergy (and Drug Allergy Not)

Learning Objectives: Upon completion of this session, you should be able to: 1) Characterize the nature and potential severity of reactions to penicillin, codeine, aspirin, local anesthetics, radiocontrast media and vaccines; 2) Determine when penicillin skin testing may be indicated; 3) Describe which vaccine constituents are most often implicated in allergic reactions; 4) Safely administer influenza vaccine to egg-allergic children; and 5) Recommend appropriate precautions for children who have had an allergic reaction to a drug or vaccine.

Interpreting Allergy Tests

Learning Objectives: Upon completion of this session, you should be able to: 1) Order appropriate allergy tests based on clinical suspicion; 2) Correctly determine meaning of positive allergy skin tests and blood tests; 3) Correlate positive food allergy tests with likelihood of clinical reaction; 4) Describe rash that might warrant patch testing for allergic contact dermatitis; 5) Appreciate the importance of spirometry in establishing good asthma control; 6) Determine whether spirometry efforts are normal; and 7) Recognize the abnormalities on spirometry that represent bronchospasm and inflammation.

Acne Update

Learning Objective(s): Upon completion of this session, you should be able to: Describe the pathogenesis of acne and various treatment options available, with a focus on efficacy for abnormal keratinization and some of the side effects of medications.

Hemangiomas and Vascular Malformations

Learning Objectives(s): Upon completion of this session, you should be able to: Discuss hemangiomas and vascular malformations, with an emphasis on diagnosis, problematic lesions, associated conditions, and therapeutic options.

Skin Manifestations of Collagen Vascular Disorders

Learning Objective(s): Upon completion of this session, you should be able to: 1) Recognize the cutaneous findings in the following disorders: morphea, neonatal lupus erythematosus, juvenile dermatomyositis, Kawasaki disease, and Henoch-Schonlein purpura; and 2) discuss of the work-up for these disorders.

Life-threatening Pediatric Dermatoses

Learning Objective(s): Upon completion of this session, you will be able to: Recognize the cutaneous findings in staphylococcal scalded skin syndrome, toxic shock syndrome, burns from child abuse, meningococcemia, Kawasaki disease, and Steven's Johnson syndrome and initiate appropriate management.

Celiac Disease and Beyond: The Spectrum of Gluten Related Disorders

Learning Objective(s): Upon completion of this session, you should be able to: 1) Differentiate celiac disease from other gluten related disorders; and 2) Choose appropriate testing to diagnose various gluten related disorders.

Recurrent Vomiting in Children: It is Not All Reflux

Learning Objective(s): Upon completion of this session, you should be able to: 1) Differentiate gastroesophageal reflux from other common causes of recurrent vomiting; and 2) Use the history and physical examination to choose appropriate testing for children with recurrent vomiting.

Chronic Abdominal Pain in Childhood: Who Suffers Most, the Patient or Physician?

Learning Objective(s): Upon completion of this session, you will be able to: 1) Differentiate functional abdominal pain from organic causes of pain; and 2) Make a positive diagnosis of functional pain based largely on history and physical examination.

Common GI Problems in Childhood

Learning Objective(s): Upon completion of this session, you will be able to: 1) Recognize specific findings on history and physical examination that aid in the diagnosis of common pediatric gastrointestinal disorders; and 2) Avoid unnecessary testing in children with common pediatric gastrointestinal disorders.

Bone and Joint Infections: New Guidelines for Management

Learning Objective(s): Upon completion of this session, you should be able to: Evaluate and manage the child with a bone and joint infection using the new guidelines.

Diagnosis, Management, and Prevention of Lyme Disease in Children

Learning Objective(s): Upon completion of this session, you should be able to: 1) Describe the signs and symptoms of Lyme disease in children; 2) Select the appropriate diagnostic tests for suspected Lyme disease; 3) Know the evidence-based recommendations for treatment of Lyme disease; and 4) Advise patients and families on personal protective measures against tick bites.

Immunization Update

Learning Objective(s): Upon completion of this session, you should be able to: Discuss current issues affecting immunizations for children in your practice.

Hot Topics in ID

Learning Objective(s): Upon completion of this session, you should be able to: Discuss new issues in infectious diseases.

When You're "Seeing Red": Recognizing the "Routine" Pediatric Red Eye vs. An Ocular Emergency

Learning Objective(s): Upon completion of this session, you should be able to: 1) List the various disease processes that would cause a clinical finding of a red eye in the pediatric population; 2) Describe the symptoms that one would expect to see in each specific red eye condition; and 3) Identify the treatment(s) for each condition.

Referring Patients to the Pediatric Ophthalmologist: It's Much More Than Just An "Eye Test"

Learning Objective(s): Upon completion of this session, you should be able to: 1) List the most common ophthalmic conditions that are routinely found in the pediatric patient; 2) Recognize the conditions that constitute an ophthalmic emergency in the pediatric patient; and 3) Identify the relationship of ophthalmic and systemic problems in the pediatric population.

Setting Things Straight with Strabismus: Understanding Strabismus, Amblyopia, and the Meaning of "Lazy Eye"

Learning Objective(s): Upon completion of this session, you should be able to: 1) Identify the different types of strabismus; 2) Define amblyopia and explain the importance of early detection and treatment of the patient with amblyopia; and 3) Discuss the various treatments of the strabismus patient.

Direct Ophthalmoscopy for the Pediatrician: How to Use One of the Most Powerful Instruments in Your Office

Learning Objective(s): Upon completion of this session, you should be able to: 1) List the steps in the appropriate use of the direct ophthalmoscope; 2) Describe the expected appearance of the normal optic disc; and 3) Name the conditions/problems which could cause an unusual appearance to the optic disc and posterior pole of the eye.

Orthopaedic Issues for Special Needs Children

Learning Objective(s): Upon completion of this session, you should be able to: 1) List the musculoskeletal problems common to special needs children; 2) Recognize the role of therapists in managing special needs children with orthopaedic issues; and 3) Discuss the role of orthotics (bracing) in special needs children with orthopaedic issues.

Update on Orthopaedic Aspects of Child Abuse

Learning Objective(s): Upon completion of this session, you should be able to: 1) Assess a child with a fracture for possible child abuse; and 2) Assess a child with a suspicious fracture for other medical conditions that may mimic child abuse.

Overuse Injuries and Return to Play

Learning Objective(s): Upon completion of this session, you should be able to: 1) Assess and manage selected overuse sports injuries in the office environment; 2) Determine when pediatric athletes can safely return to competition; and 3) Convince athletes, parents, and coaches of the risks of premature return to sports.

Musculoskeletal Physical Examination

Learning Objective(s): Upon completion of this session, you should be able to: Perform and document physical examination of the pediatric musculoskeletal system.
