COURSE DESCRIPTION

This program is designed to provide a comprehensive review and update of both established breast imaging modalities along with advances in state-of-the-art techniques. A complete discussion – with emphasis on practical advice – of analog and digital mammography, breast ultrasound and interventional techniques will provide a strong foundation to advance to newer technologies. Identifying the role and interpretation of breast MRI will be given special attention.

EDUCATIONAL GOALS

After attending the course, participants should be able to:

1. Accurately interpret a screening or diagnostic mammogram.
2. Determine the appropriate workup of a breast lesion.
3. Accurately interpret breast ultrasound exams.
4. Determine the correct follow-up after needle core biopsy of breast lesions.
5. Establish sensible indications and techniques for breast MRI exams for their own facility.
6. Accurately interpret breast MRI exams.
7. Discuss the potential advantages and possible limitations of advanced modalities for breast imaging.
