

VENOUS INSUFFICIENCY ULTRASOUND AGENDA

OVERALL GOAL:

Our overall goal is to teach students basic venous anatomy and physiology. Students should be able to evaluate images and assess for competent versus incompetent valves. Students will be provided hands-on instruction for acquiring the images and documenting varices. Educate students on post-operative evaluation and DVT.

OBJECTIVES:

- Identify normal venous anatomy
- Diagnose venous insufficiency
- Document venous insufficiency for intervention
- Evaluate lower extremity veins for DVT
- Evaluate lower extremity veins post op

TARGET AUDIENCE:

Physicians, Nurse Practitioners, Physician Assistants, and sonographers

DAY 1

8:30-9:00	Normal Venous Anatomy
9:00-9:30	Normal Venous Return
9:30-10:00	Variations of venous waveform
10:00-11:00	Venous Insufficiency
11:00-12:00	Scanning Protocol/documentation
12:00-12:30	Lunch
12:30-4:30	Hands-on scan lab

DAY 2

8:30-9:15	DVT scanning protocol
9:15-10:00	Intervention
10:00-10:45	Post Op Imaging
10:45-11:00	Pitfalls/Considerations
11:00-12:00	Case Study Review
12:00-12:30	Lunch
12:30-4:30	Hands-on scan lab
