Faculty Disclosure

It is the policy of Icahn School of Medicine at Mount Sinai to ensure objectivity, balance, independence, transparency, and scientific rigor in all CME-sponsored educational activities. All faculty participating in the planning or implementation of a sponsored activity are expected to disclose to the audience any relevant financial relationships and to assist in resolving any conflict of interest that may arise from the relationship. Presenters must also make a meaningful disclosure to the audience of their discussions of unlabeled or unapproved drugs or devices. This information will be available as part of the course material.

Course Description

The mission of this Conference is to present the latest information on CT screening for lung cancer including the component issues of early diagnosis and treatment. Topics will also include a discussion of guidelines surrounding screening as

well as practical information and options for starting a screening program.

Interesting cases selected for critical decision making will be discussed from a multi-disciplinary perspective with a focus on the management of nodules and treatment of early stage lung cancer with audience participation. A forum will be held at the end of the day for questions from the audience of lay people and physicians interested in CT screening to a panel of experts.

Objectives

At the conclusion of this activity, participants will be able to:

- Describe the principals of a successful lung cancer screening program with a focus on critical performance measures.
- Assess the development and current state of lung cancer screening so physicians can make appropriate recommendations to patients who are interested in screening.
- Identify potential issues concerning CT screening in the surgical management of lung cancer.
