THE CONGRESS IN BRIEF

Held in London for the first time, this triennial congress aims to showcase the best of European Paediatric and Adolescent Gynaecology.

Listen to and participate with expert speakers from around the world, with sessions reflecting the wide range of clinical areas that come under the umbrella of paediatric and adolescent gynaecology, ranging from adolescent endocrinology to education and standards. In addition, plans are already underway to feature live surgery via video link from University College Hospital London.

The physical, reproductive and psychological wellbeing of our children is paramount for their future health. This congress provides a valuable contemporary insight into the gynaecological issues affecting children and adolescents; their breadth and importance, serving as an invaluable educational tool and update on topical issues of increasing clinical relevance, and

encompassing the multidisciplinary approach to paediatric and adolescent gynaecology.

The congress also promises an exciting social programme making the most of the world-class heritage London has to offer. Delegates are warmly invited to attend the Gala Dinner which will be taking place at the unique House of Lords within the UK's historic parliament building, the Palace of Westminster.
