# Anaesthesia for major surgery – What's new?

---

## Introduction

It is with great pleasure that we invite you to participate in this very popular international two-day seminar on anaesthesia for major surgery.

This year's topics will cover various aspects of anaesthesia management of major surgical patients, including pre-operative assessment, intra-operative monitoring, evidence based practice of fluid and haemorrhage management and problem based solutions. Lectures will be delivered by well known international and national speakers and there will be a unique opportunity for trainees to submit abstracts for the case presentation competition.

The conference is for all practicing anaesthetists and intensivists involved in the management of major surgery patients. Last years event was a sell out and this is a great opportunity to meet with key decision makers from across the country. We look forward to you joining us at this very exciting seminar.
