GOALS & OBJECTIVES

At the conclusion of the symposium, participants will be able to:

- ▶ Identify and analyze new and important studies in medical, surgical/cosmetic dermatology, and dermatopathology.
- ▶ Apply the most current research on the diagnosis and treatment of medical dermatological conditions, such as psoriasis, eczema, actinic keratosis, rosacea, and skin cancer.
- ▶ Compare and contrast new surgical techniques including surgical closures and cosmetic procedures and apply them to their practice.
- ▶ Identify new cosmetic agents, including fillers and neurotoxins, and learn injection techniques that can improve patient safety and outcomes.
- ▶ Improve skills by observing live patient demonstrations using approved devices for the treatment of photodamage and age-related skin changes.
- ▶ Recognize, manage and appropriately treat unusual skin conditions, including the use of new relevant injectable and IV infusion treatment.
- ▶ Assess the various new modalities for evaluating and treating melanoma..

WHO SHOULD ATTEND?
