5th World Congress on ADHD

From Child to Adult Disorder

28 – 31 May 2015

Scottish Exhibition
and Conference Centre (SECC)
Glasgow | Scotland

Dear Friends and Colleagues,

The World Federation of ADHD is now established as the international home for those interested in increasing the awareness and spreading the knowledge of ADHD. We are working with several national and continental ADHD associations to promote the care and study of ADHD.

Our last meeting in Milan in June 2013 was remarkable, not only because of the quality of the scientific programme, but also because of the friendly atmosphere, which stimulated mental health professionals from all over the world to share their experience and knowledge. The Congress embraced 2,000 delegates from more than 80 countries, who have actively contributed to this success. As usual, we have tried to carefully listen to the voice of those suffering from the disorder. Next to the already traditional patient day during the congress, we could present the successful work with several national associations and stimulate WHO to create an ADHD day.

We are ready for our next meeting – the 5th World Congress on ADHD, to be held in Glasgow in May 2015. As usual, we are very happy to have a group of outstanding professionals composing our international Scientific Programme Committee, including some of the best researchers and clinicians devoted to ADHD in the world. We expect again to design an updated, vivid and challenging programme, dealing with the most relevant aspects of ADHD across the life cycle. Our Local Organizing Committee is already at work and helping us to turn this congress into a wonderful mixture of science and pleasure experiences.

Glasgow, located at the lake Clyde, is the biggest city of Scotland, and the third biggest city of the United Kingdom. In former times, it has been a strategically important point, when the United Kingdom traded with the British Colonies in the whole world.

Today, Glasgow's architecture is a mix of medieval, classical-traditional, and very modern spots. Traditional businesses exist next to industries of the 21st century and university institutions. Glasgow was the 6th European Cultural Capital and is considered an insider's tip in cultural life. The city is easy to reach from all European hubs, the U.S. and other overseas destinations by plane.

Please consider joining us by taking part in the upcoming 5th World Congress on ADHD and by becoming a member of the World Federation of ADHD.

Sincerely yours,

Luis Augusto Rohde
