

AMERICAN COLLEGE OF OCCUPATIONAL AND ENVIRONMENTAL MEDICINE

Occupational Medicine Board Review Course

If you are striving to reach – **or maintain** – the definitive credential in your profession – occupational medicine certification by the American Board of Preventive Medicine (ABPM) – look no further for expert assistance and instruction. Now you can prepare confidently for the certifying or recertifying examination. By taking the ACOEM Occupational Medicine Board Review course, you can refresh your knowledge of the exam's content, identify strengths and weaknesses in your preparation, and learn how to concentrate on areas needing more review.

ACOEM's comprehensive Occupational Medicine Board Review course covers topics relevant to the rigorous ABPM occupational medicine examination and provides sample questions and guidance for preparation and test-taking strategies. No other review course prepares you better.

Learning Objectives

Upon completion of this educational activity, participants should be able to:

- Develop a strategy for preparing for the American Board of Preventive Medicine occupational medicine (OM) certifying or recertifying examination
- Identify requirements and content of the OM exam and review sources for preparation and sample test questions
- Identify health effects of chemical, physical, biological, psychological, and ergonomic hazards
- Describe the etiology, diagnosis, treatment and prevention of occupational and environmental diseases
- Discuss control of occupational and environmental factors that affect health
- Review the etiology, diagnosis and treatment of travel-related medical conditions
- Describe the managerial and administrative aspects of occupational medicine practice.
- Outline the regulatory, legal, and ethical framework under which occupational physicians and related professionals operate, and apply this framework to cases and problems that arise in practice
- Update their knowledge of specific practice areas within occupational medicine to meet the requirements of recertification
- Apply epidemiologic, statistical, and toxicology principles to occupational medicine decision-making and practice
- Compare and contrast strengths and weaknesses of occupational epidemiological study designs
- Discuss clinical preventive medicine and health promotion in the workplace

You should attend the Occupational Medicine Board Review if you are:

- A physician preparing to participate in the occupational medicine certifying or recertifying exam administered by the American Board of Preventive Medicine.
- An OM physician interested in a comprehensive review of the field.
- A medical student or resident interested in an introductory overview of OM.
- A family physician or internist with a special interest or experience in OM.

What our Attendees Said

"Excellent board preparation. The syllabus is an excellent resource and was enhanced by Dr. Meyer's presentation."

"Well prepared for test taking & practical principals to implement in clinical practice."

"Very efficient & relevant. No wasted time."
