

REGISTER TODAY - CLASS SIZE IS LIMITED

ICIT courses now include observation of **6 live surgeries**, extensive discussion, **human cadaver exercises** and **3 live interactive webinars** over the 12 month period following the course. Course attendees can upload cases to treatment plan, or their complications for discussion. There is access to a library of past webinars, lecture presentations and recorded surgical procedures.

All at no charge for the 12 months following course attendance.

The Realities of Advanced Bone Grafting and Implant Placement

Lecture topics include:

- Bone biology and graft healing
- Mandibular graft harvesting techniques
- Guided bone regeneration with membranes
- Membrane Fixation
- Flap designs to maintain primary closure
- Osteotome techniques
- Cadwell-LUC sinus approach
- Minimally invasive sinus approaches including osteotome techniques and hierarchies of treatment selection
- Ideal socket regeneration
- Implant placement in atrophic ridges
- Immediate implant insertion in all areas of the mouth and all types of defect morphologies
- Indications for piezosurgery

Attendance is strictly limited

Course Information

Faculty

Dr. Paul A. Fugazzotto & Dr. Canyon Keeney

Course Dates

The Realities of Advanced Bone Grafting and Implant Placement

Nov 13-15, 2014 April 30-May 2, 2015 Dec 10-12, 2015

Maintain Primary Closure with GBR/Soft Tissue Grafting Around Teeth and Implants

October 23-25, 2014 June 11-13, 2015 Oct 1-3, 2015

Location

The Institute for Comprehensive Implant Therapy
25 High Street, Milton, MA 02186
(617) 698-6732

Tuition

\$2,395 (Days 1 & 2 only) 15 CE Credits
\$3,495 (All 3 Days) 21 CE Credits

The Institute for Comprehensive Implant Therapy

Maintain Primary Closure with GBR/Soft Tissue Grafting Around Teeth and Implants

Lecture topics include:

- Soft tissue graft biology and healing
- Palatal harvesting techniques
- Emdogain rationale and use
- Allograft selection and use
- Root treatment for long-term success
- Root coverage techniques
- Pedicle flap designs to attain augmentation
- Soft tissue graft placement in conjunction with GBR using resorbable and titanium reinforced membranes
- Simplified flap designs and suturing techniques
- Soft tissue grafting at implant placement
- Decision trees for material and technique selection
- Maintaining primary closure during GBR and tissue grafting

The Institute for Comprehensive Implant Therapy presents:

Realities of Advanced Bone Grafting and Implant Placement

- ☐ November 13-15, 2014 ☐ April 30-May 2, 2015 ☐ Dec 10-12, 2015
☐ Days 1 & 2 only ☐ All 3 Days
