ADVANCING EMERGENCY CARE 

American Academy
of Pediatrics

DEDICATED TO THE HEALTH OF ALL CHILDREN™

“This conference does a great job combining the practical approach to common things you see all the time with a look at what is new in PEM - the hot topics, new approaches and cutting-edge research that every EM practitioner who cares for children should know about.” — James M. Callahan, MD, FAAP, FACEP

Be a part of it ... New York City — recognized the world over, the high-rising New York City skyline is an attraction unto itself. From the Statue of Liberty to Broadway, Central Park to the Brooklyn Bridge, New York City exudes visual magic!

It's a place for sports fans, art lovers, fashion enthusiasts, and foodies; the spring time offers so much to see and do! Take a walk down Broadway and catch a show, eat at a cozy diner or taste some 5 star fare, whatever you choose will leave a lasting memory!

Join us for the 2014 *Advanced Pediatric Emergency Medicine Assembly* and you will receive the latest and most innovative findings in pediatric emergency medicine, and while you are there, take in the lights and sights of the most dynamic city in the world. Come for the education and stay for the New York City experience!

Register before February 14 and SAVE \$85

Pediatric care can be challenging — Gain the skills you need to make it rewarding!

The American College of Emergency Physicians (ACEP) and the American Academy of Pediatrics (AAP), the top names in emergency medicine and pediatrics, are teaming up once again to provide you the most comprehensive educational event this year!

This evidence-based curriculum provides you with an accelerated learning experience that covers uncommon emergency pediatric cases to tips that can help you efficiently get through the procedures you use on a daily basis.

Searching for more?

Get hands-on with our pre-conference *Pediatric Procedures Lab* or our newly added *Ultrasound lab*. Need a PEM primer? Sign up for the fast-paced and comprehensive *Essentials in Pediatric Emergency Medicine* course. Still looking for more? This conference also offers an exhibit hall featuring the latest in PEM products and services, as well as a unique opportunity to network with others that have a passion for pediatric care.

If you practice emergency medicine, pediatrics, or family practice and treat emergent patients, this conference was designed for you! Register today and see why this conference has become **the** source for pediatric emergency medicine education.

Walk away with tools and techniques you can use your first shift back

- Gain the confidence you need to prepare you to handle any pediatric patient
- Translate science into practice
- Review current techniques and procedures
- Obtain updates and cutting-edge information

Who Should Attend?

The *Advanced PEM Assembly* is for everyone who provides emergency medical care to infants, children, adolescents, and young adults. Whether you're an emergency physician, emergency nurse/nurse practitioner, pediatrician, general practitioner, hospitalist, non-member physician, physician assistant, resident, medical student, or practice manager you will gain knowledge from an extraordinary learning experience presented to you by the top names in emergency medicine and pediatrics. This advanced conference will provide insights superior to those offered anywhere else for those who are trained in pediatric emergency medicine or who want to enrich their knowledge of pediatric emergency issues.

Conference Topics

Top names in pediatrics and emergency medicine have come together to bring you the latest scientific advances and literature.

- Myths in Wound Care
- Fever: Time to Abandon Risk Stratification?
- Challenging Cases in Visual Diagnosis
- Pediatric Emergency Medical Literature: The Year In Review
- Critical Findings in Pediatric Radiology: Part One and Two
- The Newest Drugs of Abuse: Ever Changing, Ever Challenging
- EMS for Children Program: 30 Years of Advocacy
- Masters of Pediatric EM Expert Panel: Resuscitation Controversies
- Morsels and More: Online Educational Tools
- Ketamine Analgesia: New Use for an Old Drug?
- Pediatric ECGs
- Post-op Heart: When to Worry
- Black Box Drugs and other Controversies: Reality of Use in the ED
- Up the Nose: Not Only for Fingers and Foreign Bodies - Intranasal Medication Applications in Pediatric EM
- I Didn't Get That: Handoffs in the Pediatric ED
- Sleeping with the Enemy? Expectations and Reality in Imaging Children in the Emergency Setting
- Use of Oxygen in Pediatric Resuscitation: Too Much Can be a Bad Thing
- ALTE Update: Common Sense Approach to the Latest Clinical Decision Rules
- Controversies in the Management of Pneumonia in Children
- Management of the Difficult Airway in Children: Latest Gadgets and Tricks of the Trade
- Using Capnography in Pediatric Emergency Patients: Traditional and Nontraditional Uses of ETCO_2
- New Approach to Teenaged Gynecology
- Health Policy: Let's Not Forget the Children
- Keeping your ED Out of the Courtroom: The Medical Legal World of Pediatric EM

Register before February 14 and SAVE \$85

“It is the BEST pediatric specific emergency medicine course out there. It brings together the best lecturers talking about the latest updates in Pediatric Emergency medicine and still allows time for socializing with our colleagues and catching up on friendships.” — Christopher S. Amato, MD, FAAP, FACEP

Pre-Conference Options - March 17

Pediatric Procedures Lab

8:00 am – 11:00 am; 1:00 pm – 4:00 pm

Performing emergency procedures on sick infants and children can be stressful and frustrating. During this lab, you will be given an opportunity to gain hands-on practice in a number of life-saving procedures. Intraosseous line placement, umbilical vein catheters, and pediatric chest tubes to name a few. Advanced airway management techniques include needle cricothyrotomy and open surgical cricothyrotomy, along with some of the newer airway “toys” such as LMAs, Glidescopes and Storz airway viewers. The use of ultrasound will focus on peripheral vein access.

- Demonstrate several techniques for obtaining IV access in an infant or child through such procedures as powered intraosseous access and umbilical vein lines.
- Demonstrate several advanced techniques for managing the airway of an infant or child, including laryngeal mask airway, and needle cricothyrotomy.
- Demonstrate the use of ultrasound for peripheral vein access in young children.

Essentials in Pediatric Emergency Medicine

Emergency physicians, emergency nurses, pediatricians, pediatric hospitalists and family medicine physicians wishing to brush up on their knowledge of the care of children should join ACEP and AAP for the co-sponsored *Essentials in Pediatric Emergency Medicine*. This pre-conference event features fast-moving, 30-minute sessions, in a comprehensive one-day “Soup to Nuts” course on pediatric emergency medicine. Want to get in some extra CME before or after one of the pre-conference labs? Sign up for the Half-Day Essentials option when you register!

Pediatric Ultrasound Lab

8:00 am – 11:00 am; 1:00 pm – 4:00 pm

NEW!

This unique and cutting-edge ultrasound lab is designed for both the novice sonographer and the clinician looking to gain knowledge and expertise in pediatric-specific applications. The lab is divided into two sections — clinicians may choose one or both.

In the morning session, ultrasound fundamentals will be discussed, as well as core applications:

- E-FAST
- Cardiac, IVC
- Renal/Bladder
- Procedures, Vascular Access

The afternoon session will be dedicated to more advanced and pediatric-specific applications:

- Pediatric Abdomen
- Lung
- Soft Tissue, Musculoskeletal
- Shock, Hypotension

Both the morning and afternoon sessions will have hands-on activity with expert instructors in pediatric emergency ultrasound. Each participant will have the opportunity to scan in small groups, with pediatric and phantom models for diagnostic and procedural applications, respectively.

Don't Forget a Thing — Virtual Advanced PEM14 Is There When You Need It

Get access to all the courses from the conference with slides and audio that can be viewed online or on your mobile device. Downloadable MP3 files for convenient on-the-go audio are also available. Need a refresher? Can't find your conference notes? Not to worry – Virtual Advanced PEM14 will have it. Add Virtual Advanced PEM14 to your registration for the **special conference attendee price of \$259**.

Virtual Advanced PEM14 is the perfect complement to your Advanced Pediatric Emergency Medicine Assembly experience!

Exhibits

Tuesday, March 18 – Wednesday, March 19

Get ready to see the latest and greatest in pediatric emergency medicine! Our exhibit hall will feature equipment, products, and services from a variety of companies ready to show and tell you everything you want to know. Leave here with ideas and information on products and services that could be a great benefit to your practice.

Join us Tuesday evening in the exhibit hall for a Wine & Cheese Reception. This event, which has become an attendee favorite, provides the perfect opportunity to network with colleagues, faculty and exhibitors in a relaxed and fun environment.

"The diversity of topics covered and the opportunity for ED nurses to attend! I was pleasantly surprised that the content of all of the lectures was presented in a format that was not over my head! There is no comparable nursing conference that would offer a concentration of ED pediatric topics. Thanks!" — 2013 PEM Assembly Attendee

Join us in the city that never sleeps, as we study in-depth and cutting-edge technologies and practices in pediatric emergency medicine. Don't miss this dynamic conference in the heart of Manhattan. The New York Hilton Midtown is found in the heart of the city—just steps away from many of the top 10 attractions. Since 1963, the New York Hilton Midtown has become much more than a place to stay in New York City. It's a place to experience the city in ways that will inspire, delight and surprise you.
