About the Course/Learning Objectives

The goal of this course is to provide practicing physicians, residents, fellows, and nurses in medical oncology, otolaryngology, radiation oncology, and head and neck surgery with a contemporary update of management strategies of head and neck cancer using a multidisciplinary approach. Lecture and panels will provide a forum for discussion of updated therapies and new treatment innovations.

As a result of attending this conference, the participant should be able to:

- Highlight the importance and necessity of the multidisciplinary approach in treatment of head and neck cancer.
- Update his/her knowledge regarding modern surgical techniques including transoral robotic surgery approach.
- Discuss the role of PET-CT and adaptive re-planning in radiation treatment planning.
- Identify appropriate patients for chemoradiation in definitive and adjuvant settings.
- Discuss the predictive and prognostic information of detecting HPV-associated cancer.
- Manage appropriate referral decisions.
- Discuss the appropriate multidisciplinary management of salivary gland and thyroid malignancies.
