The Pharma Mini MBA

18-20 March 2026

+ 8-10 July 2026, 4-6 November 2026

A three-day accelerated management programme to give you the high-performance management skills of an MBA, designed specifically for pharmaceutical/biotechnology professionals and also applicable to medical device/animal health industries

Format:
Live online

CPD:
18 hours for your records

Certificate of completion

Course overview

Working in the highly competitive pharmaceutical industry, with ever-increasing change and pressure, is probably one of the most challenging managerial roles of any industry today. This event has been especially designed to help you transcend these challenges by training you to become equipped to see the bigger picture in all aspects of your role. It will help you build your management skills for the future and prepare you to fulfil your ambitions.

The Pharma Mini MBA accelerated management programme is a distillation of the most valuable parts of an MBA, as applied to the pharmaceutical industry. It will provide you with practical management tools to apply in the workplace, as well as giving a real taste of an MBA course with pharmaceutical case studies from business schools.

Pharmaceutical industry context – business school pharmaceutical case studies on each module

This intensive three-day course will help you to translate your learning into new behaviours and improvements in your capability and performance and will work through live issues impacting on the industry and on you directly. The individual and group exercises will focus on pharmaceutical/biopharma/generic MBA case studies, and also on your own challenges and examples. The business school case studies will help give the 'feel' of a full MBA and help you understand more about the strategies used in today's pharmaceutical and associated industries.

The Pharma Mini MBA is also an invaluable guide to all that is best and most practical on an MBA course – with specific focus on the pharmaceutical sector. It is also of value either to gain the most useful aspects of an MBA or as an MBA taster, providing a foundation of the essential MBA elements to apply directly to your role. The pharmaceutical industry requires employees to focus on successful leadership and business management skills, which this programme is designed to give you.

Benefits of attending

MBA learning style of the programme

The Pharma Mini MBA learning style is 'hands-on' rather than academic. The programme is very practical, without being too theoretical, with industry-relevant case studies drawn from business school cases. The course covers the key areas of an MBA and applies these MBA tools and concepts to the pharmaceutical industry, providing you with a firm foundation of the essential MBA thinking and terminology. Three modules will be covered in just three days of interactive workshops to enhance the value of the course and, to minimise your time away from the office, there is also optional pre- and post-course work set by the programme director.

- Develop your understanding of the key techniques of an MBA to apply to your work
- Gain a greater understanding of the pharma industry, its drivers, challenges and opportunities
- Hear about the latest strategic technology innovations being used and developed in the pharma industry
- Understand what strategic thinking is and how to use strategy tools
- Develop your leadership and strategic skills
- Become more effective in coping with and managing change in the pharma industry
- Explore the benefits and costs of doing an MBA
- Take away a Mini MBA toolkit to apply to your job
- Discuss and learn from real pharma industry case studies

Pre-course work (sent out to delegates prior to the course)

- Diagnostic questionnaire – your strategic competencies
- Discussions of diagnostic output/other areas of value

Who should attend

A 'must-attend' for professionals in the pharmaceutical/biopharma/medical device/animal health industries wishing to develop their business management skills for more senior levels and beyond mere technical ability. It will also help anyone thinking of studying for an MBA who would like an idea of what is involved. It is particularly beneficial to attend with a colleague to maximise the practical learning.

Presenters

Laura Brown

Dr Laura Brown MBA, BSc (Biochemistry), BSc (Psychology), PhD, Diploma in Clinical Science, FICR, is Chair of an international pharmaceutical management consultancy and course director and senior lecturer for the MSc in Clinical Research at the School of Pharmacy, University of Cardiff. She has also worked as an associate with Cranfield School of Management on the leadership module of the MBA programme and their strategic thinking courses.

Dr Brown worked for Cambridge Corporate Development, an international strategy consultancy, for seven years and has extensive experience in senior management roles in the pharmaceutical industry. She has worked for Wellcome, Hoechst Marion Roussel and Phoenix International and consulted internationally with numerous pharmaceutical companies in the EU, US, Singapore, China and India. She is co-author of several management books including Be Your Own Strategy Consultant, The Ultimate Book of Business Skills and Project Management for the Pharmaceutical Industry.

Leela Barham

Leela Barham is a freelancer with a background in health economics and now works in academia, as a journalist and with all stakeholders in the health care system conducting research on the economics of health and pharmaceuticals. She has over 20 years of experience and has been published in both peer reviewed journals and the specialist pharmaceutical press. She also worked to support the UK government as it agreed the 2019 voluntary scheme for branded medicines pricing and access.

Oguz Ozden

Oguz is a strategy consultant in PwC's Strategy& practice, leading large, complex and international transformations across the Pharma and Life Sciences sector. He has over 10 years of consulting experience in the sector having worked across various functions in Biotech, Pharma and Consumer Health as well as Pharmaceutical Wholesale.

Reviews

This training was great and what I enjoyed the most was : - The condensed approach with key tools to be used in my future projects - The homework with insightful pharma case studies, allowing us to reflect ahead of the day - The presentations from the guests

Anne-Claire LE MEUR
Director, Global Clinical Supply Management
IPSEN
Nov 5 2025

content was good, presentation was good, and speakers were also good

Zonera Hassan
Project Manager
CHEPLAPHARM Arzneimittel GmbH
Nov 5 2025

The content of the course was well-structured, relevant, and comprehensive, covering key areas such as strategy, leadership, finance, and marketing. It provided a solid foundation of business knowledge while encouraging practical application through interactive sessions. I particularly enjoyed the interactive workshops and team exercises, especially working with people from diverse professional backgrounds. These sessions offered a great opportunity to explore different ways of thinking, broaden my perspective, and apply concepts in a collaborative, real-world context.
