

ETM Course

EMERGENCY TRAUMA MANAGEMENT COURSE

The definitive trauma course for doctors who manage trauma

What is the ETM Course?

ETM is a 3-day face-to-face course that teaches trauma reception and resuscitation from the Australasian Emergency Medicine perspective, with a focus on practical trauma resuscitation, trauma team-leading and trauma team-member skills.

Who is the course for?

ETM is designed primarily for emergency registrars and emergency physicians, but is also highly relevant for intensive care, anaesthetic and surgical trainees and specialists, as well as pre-hospital/retrieval doctors and rural general practitioners.

Course Features

Short, focused lectures, simulation scenarios and small group interactive sessions including:

- RRM: Resus Room Management – modern ED team leading/team member skills
- Airway: Standard/difficult/failed intubation, cricothyroidotomy
- Chest: Decompression – needle/finger/tube thoracostomy
- Vascular access: Rapid Infuser Catheter (RIC) line and intraosseous needle (EZ-IO) insertion
- Orthopaedic: Spinal immobilisation, pelvic binder, CT-6 femoral traction splint application
- Other procedures: CAT/SOF tourniquet application, lateral canthotomy
- Management of traumatic cardiac arrest
- Radiology: Trauma x-ray, CT and FAST scan interpretation
- Transport: Transport and retrieval of the trauma patient
