Invitation

Silence through Science in Seoul

Dear colleagues and friends,

On behalf of the Organizing Committee, it is our great privilege and pleasure to announce that the Tinnitus Research Initiative Conference 2025 (TRI 2025 Seoul) will be held on May 15-18, 2025 in Seoul, Korea, hosted by the Korean Otological Society.

Over the years, the annual TRI conference has grown steadily, steadfast in our mission to develop effective treatments for all types of tinnitus and to share the latest breakthroughs in the field.

Next year, under the theme of "Silence through Science in Seoul", we will bring together scientists, physicians, healthcare professionals, and industrialists from around the globe, providing a unique opportunity to exchange ideas and share research and clinical innovations in the field of tinnitus.

Seoul, the host city for TRI 2025, is a fascinating city located along the Han River of Korea, embracing ancient culture and historic buildings with modern developments in a surprisingly harmonious way. This well-balanced blend is perhaps how we should learn in our field as well; preserving the old and envisioning the new.

So please, mark your calendars and prepare to join us for an unforgettable gathering at TRI 2025 Seoul. We look forward to welcoming you to Seoul next year!

Sincerely,

Shi Nae Park

Shi Nae PARK M.D., Ph.D.

President, TRI 2025 Seoul
