THE BRISTOL AND CARDIFF ACHD ECHO COURSE

Monday 2nd and
Tuesday 3rd October 2017
Engineers' House
Conference Centre, Bristol

Objectives

The inaugural Bristol & Cardiff ACHD Echo Course is a two-day programme providing a comprehensive overview of echocardiography in adult patients with congenital heart disease. The course covers the simple and complex cardiac lesions that are encountered in contemporary clinical practice. In each session:

- the morphology of each cardiac lesion is demonstrated
- echocardiographic features of the native lesion are described
- surgical and/or interventional treatments are explained, and
- postoperative/follow up echocardiography is described

Lectures will be supplemented by illustrative case presentations.

The Bristol & Cardiff ACHD Echo Course provides:

- invaluable structured teaching in ACHD echocardiography to cardiologists, cardiac physiologists and echocardiographers
- an ideal introduction to ACHD for all cardiology trainees specialising in imaging
- comprehensive revision of echocardiography for ACHD specialists (including paediatric cardiologists and trainees with an interest in ACHD)
- a comprehensive curriculum for those preparing for BSE or EACVI accreditation or re-accreditation
- interest and insight from echo-anatomic correlations and surgical illustrations for anyone working in ACHD

The course is co-directed by Dr Stephanie Curtis, Clinical Lead for Echocardiography and ACHD at the Bristol Heart Institute and Dr Nav Masani, Cardiologist and Past President of the British Society of Echocardiography. We are delighted that our faculty includes national leaders and renowned teachers in adult congenital heart disease and cardiac surgery, cardiac morphology and echocardiography.
