

3rd ESO ESMINT ESNR stroke winter school: 9th to 12th February in Bern, Switzerland

ESO organizes together with ESMINT and ESNR a stroke winter school for young stroke physicians and neuroradiologists on the topic of acute interdisciplinary stroke treatment.

Aim:

The goal of the stroke winter school is to join young stroke physicians and young neuroradiologists in order to enhance interdisciplinary management of patients with acute ischaemic stroke. Secondary goals of the winter school are to perform «hands-on» courses for interventional neuroradiologists and special teaching sessions for stroke physicians.

Target audience:

Young stroke physicians and neuroradiologists with a major interest in cerebrovascular diseases are eligible. Applicants should currently be in training in a European teaching hospital that treats acute stroke patients. The organizing committee will select 20-30 interventional neuroradiologists and 20-30 young stroke physicians based on their

- application
- country of origin
- the expected benefit to the individual and
- to his/her stroke unit and country

Since the main aim of the course is to enhance interdisciplinary stroke management, **pairs of neuroradiologists and stroke physicians from one institution** will be preferred. If there are available places, applications from non-European countries may be considered by the organizers. The final decision about the participants remains with the local organisation committee.

Scientific content:

A daily teaching program in English by experts in all subspecialties of acute stroke treatment will be held. There will be joint sessions for neuroradiologists and stroke physicians in the morning. In the afternoon there will be special courses for stroke physicians and «hands-on» courses for interventional neuroradiologists. Teachers will be local, national and international experts in this or related fields.

Core faculty:

The local organising committee will form a tentative core faculty with representatives of all three participating organisations, i.e. European Stroke Organisation (ESO), European Society of Minimal Invasive Neurological Therapy (ESMINT), and European Society of Neuroradiology (ESNR).

Course venue:

Langhans Hörsaal
Departments of Neurology and Diagnostic
and Interventional Neuroradiology
University Hospital Bern
Freiburgstrasse 10
CH-3010 Berne, Switzerland

Costs:

The costs of the ESO–ESMINT–ESNR Winter School will be borne by the organizers. However, to cover a part of costs for board and lodging participants will have to pay a share of € 400.–. Furthermore, participants have to cover their travel expenses, their activities outside the official program, and any other personal expenses during their stay.

Deadline for application: 31.10.2015
