

National Airway Program Singapore (NAPS) 2025

20 September 2025, Saturday
8am to 5pm

Simulation and Integrated Medical Training Advancement Centre (SIMTAC)
Centre for Healthcare Innovation, Tan Tock Seng Hospital, Singapore 308433

INTRODUCTION

First started in 2018, NAPS is our annual airway workshop, helmed by airway leads from all restructured hospitals in Singapore, many of whom are also members of the Singapore Society of Anaesthesiologists (SSA) Airway Special Interest group. NAPS 2025 aims to teach advanced airway management skills to airway practitioners. Together with our industry partners, we are constantly striving to improve the content of our course and always have something new to offer. This year, we have added an ESCAPE Room themed simulation. Wet lab session will focus on teaching CICO techniques using pig tracheas. We hope all participants will gain confidence and competency in advanced airway techniques at the end of the course. So come join us at NAPS 2025 to hone your airway skills and knowledge. We look forward to seeing you on 20 September 2025.

WHO SHOULD ATTEND

All medical practitioners who perform advanced airway management in their daily clinical practice

REGISTRATION FEES (inclusive of prevailing 9% GST)

- **Early bird fee (until 30 June 2025): SGD 600 (SGD 654 incl GST)**
- **Normal fee (from 1 July 2025 onwards): SGD 750 (SGD 817.50 incl GST)**
- **Register by 20 August 2025**
- A Certificate of Attendance will be issued to those who attend 75% of the workshop
- The Singapore Medical Council has awarded the workshop 4 CME points
- To register for the workshop, please complete this registration form and email it to nora_amin@ttsh.com.sg

COURSE HIGHLIGHTS

- Pig tracheas for adult front-of-neck-access
- ESCAPE room
- Bronchoscopy simulator
- Lung isolation techniques
- Subspecialty airway stations (SALAD, shared airway, THRIVE, paediatrics CICO)

PRELIMINARY PROGRAMME

Advanced Airway Management

- Combined device use
- Airway management in alternate positions
- Airway and Gastric ultrasound
- Flexible bronchoscopy
- The shared airway and THRIVE
- Lung Isolation
- SALAD
- Interesting cases discussion – **cases contributed by you!** (*attractive prizes to be won if your case is chosen!*)

SPECIAL FEATURE
Airway games – ESCAPE Room

Like us on
Facebook

Advanced Surgical Airway Management

- Adult and paediatrics Front-of-neck-access (cannula, Melker, scalpel-bougie) techniques on pig tracheas/manikin
- Oxygenation strategies

For enquiries, kindly email Dr Zhang Jinbin (jinbin_zhang@ttsh.com.sg) and Ms Nora Amin (nora_amin@ttsh.com.sg)
