FRONTIERS **IN UPPER EXTREMITY SURGERY**

COURSE DIRECTOR

Michael J. Garcia, MD
Hand & Upper Extremity Surgeon
Florida Orthopaedic Institute
Tampa, FL

JOINTLY PROVIDED BY

fore
Federation for Orthopaedic
Research and Education

COURSE DESCRIPTION

This course provides a comprehensive update on treatments for various hand and upper extremity surgery including arthroplasty, reconstruction, fracture care, care of the upper extremity in the pediatric patient, difficult problems in elbow surgery, and shoulder surgery for the hand surgeon. Learners will gain insight into both common and complex problems of the upper extremity, understand indications for surgery, therapy, outcomes of each, and potential complications of intervention. The course format is a mix of lectures, hands-on cadaveric labs, and engaging panel discussions.

TARGET AUDIENCE

Orthopaedic and plastic surgery trained hand surgeons, general orthopaedic surgeons, fellows, residents, physician assistants, physical therapists, surgical assistants, nurse practitioners, nurses, and other healthcare professionals whose scope of practice includes hand and upper extremity surgery.

OBJECTIVES

By the end of this course, learners should be able to:

- ▶ **Evaluate** surgical and nonsurgical principles of managing common hand and upper extremity problems
- ▶ **Address** common problems and complications associated with distal radius fractures
- ▶ **Implement** enhanced management of fractures, arthritis and congenital problems
- ▶ **Employ** current techniques in microsurgical reconstruction in the upper extremity
- ▶ **Apply** current concepts for total wrist arthroplasty
- ▶ **Develop** strategies for the total and partial treatment of the shoulder, including: rotator cuff tears, shoulder instability, and arthritis
