AOP 2022

INTERNATIONAL EDITION N°33

JANUARY 7 & 8

PALAIS DES CONGRÈS • PARIS - FRANCE

SCIENTIFIC PROGRAM

AOPCONGRESS.COM

WELCOME TO AOP 2022 !

Welcome to the 33rd edition of AOP Congress!

Over the past 33 years, the AOP Scientific Board and team have steadily expanded in size and content of this congress, bringing together ophthalmologists from all over the world to share their groundbreaking research and cases.

The growing influence of AOP has motivated us more than ever to become the organism to provide not only evidence-based facts, but also one to reinforce international and inter-generational exchange to revisit the way we understand and practice ophthalmology. To achieve this, AOP deployed a new methodology to build and present this year's conference.

The scientific program is structured around 12 core themes in ophthalmology including cataract, cornea, contactology, glaucoma, pediatric-ophthalmology, refractive surgery, retina and vitreous.

The content of each theme is managed by a AOP Scientific Board member specialized in the topic, who reaches out and recruits internationally renowned experts to insure that the educational material is scientifically accurate and delivered by the top references in each subspecialty.

The carefully crafted 70 scientific sessions are presented in different teaching formats that are dynamic and interactive, inciting exchange between speakers and attendees. Tune in during the battle format as the experts "battle" to support or defend their approach, or challenge your practical knowledge during MCQ sessions on challenging clinical cases.

For those who are tactile learners, the 6 AOP labs taking place in parallel to sessions offer excellent hands-on opportunities. These small group trainings, led by highly skilled trainers, allow participants to work in customized laboratories on the latest surgical devices and machines. The AOP labs are unique in many ways, but most importantly, they are non-sponsored, brand-free lab sessions with the sole intent of providing practitioners with objective medical training.

At AOP, the learning continues outside the 5 rooms and 6 labs!

We encourage you to take a stroll around the exhibition area to discover the industry technologies and developments, or to participate in social events like the Networking Cocktail for new and meaningful professional connections.

We look forward to meeting you at AOP Congress in 2022!
