Speaker

Ziv Simon, DMD, MSc

Dr. Simon is a Diplomate of the American Board of Periodontology and a Fellow of the Royal College of Dentists of Canada. He publishes and lectures nationally and internationally on esthetics, tissue reconstruction and computer-guided implant dentistry. Dr. Simon is the founder of the Beverly Hills Multidisciplinary Dental Study Group and the President of the Beverly Hills Academy of Dentistry. He maintains a private practice limited to periodontics and dental implants in Beverly Hills, California. Dr. Simon is the creator of SurgicalMaster™, a surgical training program for dentists.

Synopsis

Surgical procedures are an integral part of every dental practice. Dentists perform procedures such as extractions, periodontal surgery and implant placement that often require suturing skills. However, some clinicians may experience challenges such as premature suture loosening, flap opening and tearing, bent needles, and inability to stabilize flaps.

Improper suturing can lead to complications and even treatment failures.

The goal of this practical course is to train dentists in predictable suturing techniques. Participants will learn about different types of suture material and needle configuration and indications for their use. Principles of correct suturing, including concepts of suture mechanics, will be reviewed to enable participants achieve stable knots and immobile flaps.

The hands-on portion of the course will include an “over the shoulder” instruction as doctors go through Dr. Simon’s unique teaching method. Participants will learn different suture and needle types and experience a systematic exercise of the most commonly used suturing techniques in dental practice.

Topics to be discussed:

- Suturing safety
- Suture mechanics
- How to choose suture material and when to use it
- Needle types and their use
- Interrupted vs. continuous suturing
- Coronal vs. apical repositioning sutures
- The most useful suturing techniques
- Suturing for exodontia, bone grafting and implants
- Suturing for primary closure
- How to deal with suture challenges and complications

Hands-On Exercise

Doctors will practice all suture types reviewed in the lecture on dedicated models. This intensive suture exercise will allow participants to understand the important principles of suturing and be able to apply it when treating patients.

This course is recommended for doctors at any level who are interested in improving their suturing skills. It will provide participants with practical information on how to suture properly and improve surgical treatment outcomes.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.
