

The LDN 2017 Conference

September 22 - 24, 2017

Portland, Oregon

Sheraton Portland Airport Hotel

LDN 2017

PORTLAND, CONFERENCE

We are delighted to welcome those who have been able to travel to Portland and our global audience who are joining us via our unique interactive live stream service.

The LDN 2017 Conference is the only LDN focused event in the world and the premier auto-immune chronic disease and cancer conference of its kind. It is here where the LDN community comes to meet, share ideas and learn from each other. You have the unique opportunity to mingle and present your questions to the experts.

This unique conference will feature the latest information from 31 amazing speakers, on topics ranging from practical LDN advice about the dosing and mechanism of action of LDN, to the latest research on and experience with the use of LDN to treat a wide variety of autoimmune conditions, cancers, pain and mental health.

Admission to the conference includes online access to the recorded presentations and case studies

The LDN 2017 Conference provides CE credits for ND's: The Oregon Board of Naturopathic Medicine have awarded 27.75 and The American Association of Naturopathic Physicians have awarded us 26.

You won't want to miss our Expo Zone, dedicated to showcasing products and services from leading pharmacy companies from the USA, Canada, Germany and the UK.

This is a time of great promise. Numerous research studies as well as reports from patients, their physicians and pharmacists are showing tremendous breakthroughs and success using LDN for autoimmune disease, pain, cancers, mental health, autism and infertility. Our optimism must be backed by action and drive if we are to see LDN reach its full potential.

We would like to thank all the speakers for giving their time to be with us. Without them there would be no conference! I hope you have a rewarding time at our conference.

**Linda Elsegood: Founder & Trustee
LDN Research Trust**

A big thank you to all our amazing Volunteers for their dedication, who work tirelessly without pay. There are too many to list but everyone is appreciated for all they do!

The conference is a charity event organised by the LDN Research Trust, a registered charity in the UK dedicated to enhancing awareness of Low Dose Naltrexone (LDN).

Special thanks to our
MC, Dr Mark Mandel

Sales and Marketing

Jim Warner

Sandra Arthur

We are honoured to have the help and support of our Diamond Sponsor Fritz Bell, better known years ago as “Good Shape” and his charity GivenShare Inc. We are grateful for his tireless efforts throughout the years to educate patients and physicians in the use of LDN.

A word from our Gold sponsor:

Enovex's founder, Dr Ike, "As a compounding pharmacist, your job satisfaction is seeing the medications that you prepare make a difference, change lives and provide hope and relief for your patients. LDN is one of those medications, when prepared and used properly will give one of the best results. We are passionate about compounding and very optimistic about LDN and all the possibilities that it can offer to our patients. LDN is one of the most common compounds we make in our pharmacy and being a sponsor for the biggest event of the year was a natural extension of our pharmacy practice."

Event Sponsors

Sincere thanks to our wonderful Sponsors, Exhibitors, advertisers and Supporters.

Conference Etiquette

Please put cell phones and lap tops on silent mode. If you need to use your cell phone, please do so in a break. If you are entering or re-entering the conference room during a presentation, please take a seat at the rear of the room until the end of the presentation. Please be aware and considerate of the fact that we are live streaming the event, e.g. by

making sure you are in your seat before each session begins and avoiding unnecessary noise and keeping conversations for outside the conference room.

No photography or videography is permitted, however you will have free access to the live stream for 12 months.

Q & A Information

Questions may be submitted to the experts on the Q&A panels, please write them on the notepads provided and hand to a volunteer. ZRT Laboratories has generously provided pads and pens for this purpose.

Live stream participants should submit their questions via email to questions@ldn2017.com

THE LDN BOOK

Low Dose Naltrexone (LDN) holds the potential to help millions of people suffering from various autoimmune diseases and cancers, and even autism, chronic fatigue, and depression, find relief.

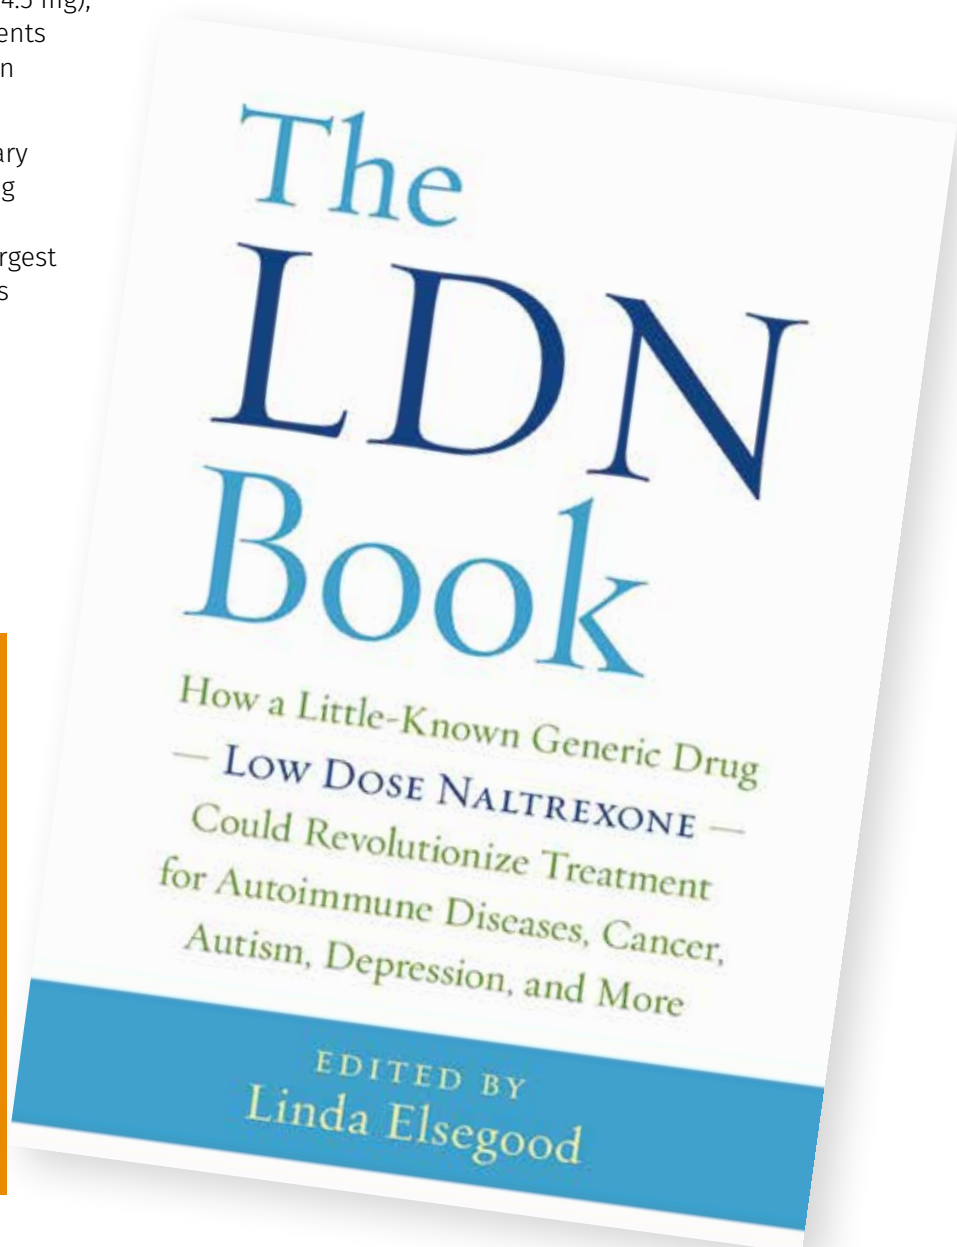

Administered off-label in small daily doses (0.5 to 4.5 mg), this generic drug is extremely affordable and presents few known side effects. So, why has it languished in relative medical obscurity?

The LDN Book explains the drug's origins, its primary mechanism, and the latest research from practicing physicians and pharmacists as compiled by Linda Elsegood of The LDN Research Trust, the world's largest LDN charity organization with over 19,000 members worldwide. Featuring ten chapters contributed by medical professionals on LDN's efficacy and two patient-friendly appendices, The LDN Book is a comprehensive resource for doctors, pharmacists, and patients who want to learn more about how LDN is helping people now, and a clarion call for further research that could help millions more.

Chelsea Green Publishers are offering for non- bookstore retailers a special conference offer.

- 55% non-returnable discount for one order of 10 copies or more, with Free Shipping on 25+ books.
- To place an order contact Darrell Koerner dkoerner@chelseagreen.com quoting "LDN17"

The LDN Book will be available to purchase at the LDN 2017 Conference in Portland at the discount price of \$20.

LDN Research Trust Forum

The LDN Research Trust has an active message forum which acts as an interactive site where you can gather useful information, read about other people's experiences, post a message or offer support to other people.

The forum is ideal for communicating with like-minded people who understand, and can relate to the many difficult issues which having MS and other autoimmune diseases bring.

Visit the forum here: www.forum.ldnresearchtrust.org

Dr. Darin Ingels specializes in Lyme disease, autism, allergies and other immune and autoimmune disorders. As a naturopathic doctor, he focuses on using therapies that help modulate the immune system and improve immune function to help you overcome persistent or recurrent infections, autoimmune illness or chronic allergies.

Dr. Ingels is also an environmental medicine doctor, so he recognizes the impact of environmental influences on health, including diet, toxic exposures, lifestyle habits, mold or other allergens, stress and sleep as triggers for undermining your immune system. He uses diet, herbs, homeopathy, lifestyle counseling, immunotherapy and low dose naltrexone to help you achieve better health.

ULTRA LOW DOSE NALTREXONE

2 mcg - 25 mcg
Naltrexone

5-7 Days
Before Reducing Opiate Dosage*

20% - 40%
Opiate Dosage Reduction*

Many of you have obviously heard of Low Dose Naltrexone (LDN) and the multitude of the conditions that it can be beneficial for. Some of you may not have heard about the benefits of ULTRA Low Dose Naltrexone. We are talking about 2 mcg to 25 mcg dosage forms that can be very helpful for a specific subset of population. We use this therapy on patients who have developed tolerance to the opiates and are on escalating doses of narcotics without sufficient pain control or on patients who are stable on a specific dose, but would like to have the opiate dose reduced.

The studies and the personal experience have shown that we can reduce the dosages of opiates from 20-40% on most patients once the therapy is initiated. Give a patient about 5-7 days on the once at bedtime dosing before attempting to reduce opiate dose. The mechanism of action is attributed to the naltrexone binding to the opiate receptors and preventing the downregulation of the receptors, thus making more receptors available for the opiates floating around in the blood. We successfully use this therapy in our pharmacy for Hospice patients and pain management clinics to achieve better pain control with fewer narcotics.

This compound is actually harder to make because of the 2 step process involved in first making a triturate then being able to weight a measurable amount of naltrexone to make the capsules.

Keep in mind that LDN at 2mg-4.5mg will block enough opiate receptors to put patients in withdrawal, but 2mcg will not!
