DR JONE KIM

Dr. Jone Kim attended UCLA undergraduate and then went on to UCLA dental school. After graduating from the dental school, he completed a residency in oral & maxillofacial surgery in 1998 at University Medical Center – Fresno (UCLA). After his residency, he did a fellowship in orthognathic and facial reconstructive surgery. He has a private practice in Brea, California and is a part-time faculty in department of oral & maxillofacial surgery at UCLA school of dentistry. He is board certified by American Board of Oral & Maxillofacial Surgery and member of numerous dental organizations. Dr. Kim has lectured numerously in US and abroad about implant surgery and other oral & maxillofacial surgery topics.

1. Extraction: Fundamentals of surgical extractions. This lecture will discuss about the basics and fundamentals of surgical extractions. Flap design, suturing and extraction techniques, including flapless extraction, will be some of the topics discussed during the lecture.
2. Ridge Preservation Bone Graft (RPBG): What general dentists should know about bone remodeling with subsequent bone loss after the extraction. Ridge preservation bone graft is a simple surgical technique that will decrease bone resorption after the extraction, which results in a better alveolar ridge for implant placement. This lecture will discuss about indications, rationale and technique of RPBG.
3. Oral pathology: some of the common oral lesions seen in a private practice office. Some of the topics covered in the lecture will be biopsy technique, when to refer out and what to look for in the oral cavity.
4. Oral Medicine: As the population ages, dentists will be treating more patients with various medical conditions. This lecture will discuss some of the common medical conditions that general dentists may encounter in their office.
5. Implant complications.
