Gastrointestinal Endoscopy

ASGE MASTERCLASSES

Infection Control and Artificial Intelligence

ASGE Masterclass: Infection Control Friday, June 18

Earn 7 AMA PRA Category 1 Credits™

Endoscopy-related infection control practices have been an important part of patient safety protocols. As a result of the COVID-19 pandemic, many have reassessed current and future practices in this area. Review the most updated recommendations and best practices on establishing and maintaining general infection control practices within an endoscopy unit and how to best to operationalize a high-quality, safe environment for patients and personnel.

ASGE Masterclass: Artificial Intelligence Saturday, June 19

Earn 4.5 AMA PRA Category 1 Credits™

Review current practices and applications of AI in GI endoscopy, including colorectal polyp detection, polyp characterization and prediction of invasive cancer within a polyp lesion. Other topics and applications will include wireless capsule endoscopy images and videos, localization and diagnosis of esophageal and gastric pathology on EGD and image analysis of endoscopic ultrasound images.
