10th ANNUAL PERIOPERATIVE MEDICINE SUMMIT

February 26-28, 2015 • Westin Kierland Hotel and Spa, Scottsdale, AZ

OVERVIEW

The goal of this 3-day summit is to enable clinicians who are actively engaged in perioperative medical care to incorporate the latest findings from clinical research and recommendations from evidence-based guidelines into their practices so that they can improve the quality and safety of their medical care.

TARGET AUDIENCE

Internists, hospitalists, family practitioners, anesthesiologists, physician assistants, surgeons, certified nurse anesthetists, nurse practitioners and allied health professionals engaged in management of the perioperative patient.

SELECTED OBJECTIVES

As a result of participating in this activity, participants will be able to:

- Review the goals of the Choosing Wisely initiative as they relate to perioperative care
- Outline approaches to improving value when delivering perioperative care
- Demonstrate common preoperative endocrine problems using a case based approach
- Provide practice recommendations for management of the surgical patient with endocrine disease
- Highlight significant new literature in perioperative medicine
- Evaluate the impact of new literature on clinical practice
- Review recent guidelines regarding preoperative evaluation prior to noncardiac surgery
- Apply available evidence as perioperative cardiovascular risk reduction strategies
- Outline perioperative challenges for the obese patient
- Review current literature on medical management of the obese patient
- Highlight controversial areas in the literature that commonly impact perioperative practice
- Review evidence regarding the utility of preoperative echocardiography in the preoperative setting
- Highlight controversial areas in the literature that commonly impact perioperative practice
- Review evidence regarding the utility of routine urinalysis in the preoperative setting
- Provide an introduction to Enhanced Recovery pathways
- Outline evidence based development of Enhanced Recovery pathways with an example
- Outline implementation strategies for clinicians wanting to establish enhanced recovery at their home institutions.
- Describe the Perioperative Surgical Home concept
- Review the advantages and disadvantages of the Perioperative Surgical Home
- Illustrate how the Perioperative Surgical Home will impact the specialties currently involved in perioperative care

February 26-28, 2015 • Westin Kierland Hotel and Spa, Scottsdale, AZ

HOTEL INFORMATION

Westin Kierland Hotel and Spa
6902 E Greenway Pkwy
Scottsdale, AZ 85254

A block of rooms has been reserved for conference participants at a discounted rate of US \$289/night + 13.27% tax/day. The rate is guaranteed only until **February 4, 2015**. The hotel extends the group rate 3 days pre and post conference dates based on availability. After this date, reservation requests will be considered on a space-available basis.

For reservations under this hotel block, call 1-800-354-5892 and reference Perioperative Medicine Summit 2015 or reserve online via: [Westin Kierland Hotel Reservations](#)

All reservations should be received by the hotel no later than February 4, 2015. All individual reservations must be accompanied by a first night room deposit or guaranteed with a major credit card. Hotel will not hold any reservations unless secured by one of the above methods.

CALL FOR ABSTRACTS

For Abstract Submissions Visit: <http://periopmedicine.org/p/can-i-submit-abstract.html>

Abstracts are invited for presentation at the Perioperative Medicine Summit being held in conjunction with the Society for Perioperative Medicine and Quality Improvement (SPAQI).

SUBMISSION DEADLINE

Abstract submissions must be received no later than Sunday, **January 11, 2015**. Submitting authors will be notified of acceptance or rejection by Tuesday, January 23, 2015.

SUBMISSION CATEGORIES

RESEARCH IN PERIOPERATIVE MEDICINE

Submissions can report clinical and/or laboratory-based research or consist of a systematic review of a clinical problem. Research abstracts concerned with efficiency, cost, or medical decision-making are also encouraged.

INNOVATIONS IN PERIOPERATIVE MEDICINE

Authors who wish to describe an innovative program in perioperative medicine are encouraged to submit to this category. Innovations will primarily be descriptive, but they may also include preliminary data. A more rigorous evaluation of an innovative program should be submitted as a research abstract, rather than an innovation. For example, an innovation may describe a novel strategy for dissemination of practice guidelines, whereas a research abstract may analyze its impact on length of stay or post-operative morbidity or mortality.

PERIOPERATIVE CLINICAL VIGNETTES

A clinical vignette is a report of one or more cases that illustrates a new disease entity or prominent or unusual clinical feature of an established disease, highlights an area of clinical controversy in perioperative medicine, or illustrates a unique patient safety issue. It may include a summary of pertinent patient history, physical findings, laboratory data, or management description. It should be clear from the discussion of the abstract why the vignettes are appropriate for a perioperative medicine competition (versus general internal medicine, hospital medicine, or anesthesiology). Clinical vignettes will be judged on originality, organization, writing clarity, and relevance to perioperative medicine.
