CONFERENCE DESCRIPTION

With more Americans living in increasingly dense population centers, the practice of Emergency Medicine has been adapting to a unique set of circumstances. **Healthcare disparities, special populations, urban violence, drug and alcohol abuse, and much more, all converge to form what has been called “Urban Emergency Medicine.”** This conference will explore emergency medicine in the urban healthcare environment through a wide range of evidence-based reviews of the special clinical challenges that emergency physicians, nurses, nurse practitioners, physician assistants, as well as out-of-hospital providers, face daily. The goal of this conference is to increase knowledge and enhance the competence of attendees. Emphasis will be placed on practical application of the evidence-based topics presented.

Topics for this conference have been selected based on the educational needs determined from the identified professional practice gaps. The gaps were derived from a variety of sources including clinical expert input and other medical and nursing data.

Conference format will include didactic lectures; smaller group lab breakouts offering hands-on teaching of bedside ultrasound, airway management, critical emergency medicine procedures, and simulation training; case studies; as well as question and answer sessions.

An outstanding faculty has been assembled for this conference. Each member was selected based on their individual area of expertise and ability to communicate current, evidence-based, and practical information to participants.

You are sure to enjoy our conference on **Urban Emergency Medicine** while sharing ideas and experiences with colleagues from across the country in the exciting city of San Francisco.

CONFERENCE OBJECTIVES

As a result of participating in this conference, you should have increased knowledge and enhanced competence to...

- Recognize the impact of healthcare disparities on patient well being and the delivery of emergency medicine in an urban environment
- Implement the use of bedside ultrasound in the evaluation and management of critically ill patients in the Emergency Department
- Describe the assessment and management of the difficult airway
- Identify and manage the needs of special patient populations, including victims of substance abuse and intimate partner violence
- Incorporate new techniques for managing pain in the pediatric patient

ACCREDITATION

This educational activity was planned and produced in accordance with the **ACCME** and **ANCC** Essentials and Standards relating to continuing medical and nursing education.

Symposia Medicus is accredited by the **Accreditation Council for Continuing Medical Education (ACCME)** to provide continuing medical education for physicians.

Symposia Medicus is accredited as a *provider* of continuing nursing education by the American Nurses Credentialing Center's Commission on Accreditation.

Each participant should only claim credit commensurate with the extent of their participation in the activity.

Certificates of credit will be given to participants on-site at the conclusion of the conference.

CONTINUING EDUCATION CREDIT
