

paediatric **UPDATE** conference 2015

Wednesday, April 29
to Saturday, May 2, 2015

Toronto Region Board of Trade
Toronto, Canada

www.sickkids.ca/puc

SickKids[®]

UNIVERSITY OF TORONTO
FACULTY OF MEDICINE

paediatric **UPDATE** conference 2015

Royal College of Physicians
and Surgeons:

MOC Section 3 credits

Some workshops have also been assigned Section 3 credits for the Royal College of Physicians and Surgeons as they have met the accreditation standards for Section 3 (knowledge assessment).

Participants must register by April 1, 2015 and complete the pre-conference requirements no later than April 20, 2015 to be eligible.

Please visit the website for full details. www.sickkids.ca/puc

SickKids®

Conference Overview

About the Conference

Designed for paediatricians, family practitioners, physician trainees and allied health care professionals involved in community child health care, SickKids Paediatric Update provides the latest information on current issues in paediatrics presented by more than 80 experts in the field. With over 30 interactive and engaging sessions in both small and large group learning formats, this 4-day event offers the opportunity to advance knowledge and skills in paediatrics.

Learning Objectives

At the end of this conference you will be able to:

- Discuss a wide range of current issues in paediatric clinical practice.
- Apply new and innovative evaluation techniques and management strategies for paediatric disorders.
- Enhance your clinical skills for the management of critically ill children and neonates.
- Describe current ethically challenging issues in every day interactions with patients and families, and help them strategize solutions.

Target Audience

- Paediatricians
- Family Physicians
- Nurses and Nurse Practitioners
- Allied Health Professionals
- Bioethicists
- Health Researchers
- Health Lawyers
- Administrators of Health Professional Associations and Colleges

Education Credits

This program meets the accreditation criteria of the College of Family Physicians of Canada and has been accredited for up to 21.0 MAINPRO ®-M1 credits. This event is an Accredited Group Learning Activity (Section 1) as defined by the Maintenance of Certification Program of the Royal College of Physicians and Surgeons of Canada, approved by the University of Toronto (21.0 credits). Some workshops have also been assigned MOC Section 3 credits (see left side/website for details).

UNIVERSITY OF TORONTO
FACULTY OF MEDICINE

Conference Agenda

Day 1: Wednesday, April 29, 2015

Bioethics Subspecialty Day: Everyday Ethics in the Health Care of Children

8:00 – 8:50 am Registration & Breakfast

8:50 – 9:00 am Welcome and Introductions

*Mark Feldman, Conference Chair;
Jonathan Hellmann,
Subspecialty Day Chair*

9:00 – 10:00 am Grand Rounds Keynote: Current Controversies in Paediatric Bioethics

John Lantos

Brain death, medical futility, whole genome sequencing, vaccine-refusing parents and other issues continue to cause controversy in clinical and research ethics. Dr. Lantos will discuss the philosophy behind the headlines and suggest ways for doctors and researchers to respond to these issues.

10:00 – 10:20 am Morning break

10:20 – 10:40 am Institutional Ethics and Patient Safety: Balancing Perspectives

Michael Apkon

10:40 – 11:00 am Children as Research Participants: 5 Ethical Issues

Ronald Grant

This session will review assessment of capacity in the paediatric age group highlighting differences and similarities between consent in a clinical and a research setting.

11:00 – 11:20 am The Ethics of Whole Genome Sequencing: A Personal Journey

Ronald Cohn

This session will discuss the complexities of consent and decision making about next generation sequencing for patients as well as outline a personal experience.

11:20 – 11:40 am When do I call CAS? The Grey Zone

Michelle Shouldice

Did that parent really... smack her infant?! Yell at his toddler for crying?! Forget the appointment again?! This session will illustrate an approach to considering cases of harsh discipline, parenting concerns and neglect where a practitioner's decision to report to child protection services may seem unclear.

11:40 – 12:00 pm Ethics Schmethics – All a Parent Wants is Humanity and Compassion

Diane Flacks

What do parents really want and need from our health care professionals? How can we truly have family centred care, involvement in decisions, the best possible outcomes for our kids, and maintain our sanity?

12:00 – 12:20 pm Caught in the Social Media Storm: What's a Healthcare Provider to Do?

Rebecca Greenberg

This talk will explore ethical issues associated with using social media in the healthcare setting. We will discuss common dilemmas including: Facebook requests, "Googling" patients or reading their blogs, responding to requests to help families with online fundraising campaigns, and general considerations for engaging in social media.

12:20 – 1:30 pm Lunch

Day 1: Wednesday, April 29, 2015: Bioethics Subspecialty Day

1:30 – 2:10 pm Panel: **Family-Centred Care in a Paediatric Setting: Ethical, Legal and Clinical Considerations**

Lee Ann Chapman, Diane Sacks, Randi Zlotnik Shaul

How do we make certain that the voices of the child or adolescent are heard and their right to self-determination and autonomy is fully understood within the concept of Family Centered Care? The panel will explore these areas that impact care from the ethical, legal and clinical perspectives.

2:15 – 3:15 pm **Concurrent breakout sessions**

(Choose two 1 hour sessions from the list below; sessions will repeat at 3:30 pm)

W1 *Adolescents are a Vulnerable Population: How Should HCPs Respect Their Decision-Making Capacity? (will be repeated)*

Alene Toulany, Ashley Vandermorris

This session will use an interactive case-based discussion to explore the vulnerabilities that are unique to adolescents. Common ethical dilemmas confronted by paediatric providers caring for both the 'stereotypical teen' and youth with disabilities will be highlighted.

W2 *I Have a Full Waiting Room: How Do I Advocate for Those With Complex Issues? (will be repeated)*

Malini Dave, Barbara Muskat, Leo Levin

Paediatric offices and clinics are busy places with complex issues frequently raised by families. How does a physician recognize that issues related to the social determinants of health can be just as clinically important as an emergent mental health issue or a physical illness? This workshop will provide an overview of some of these issues and offer concrete strategies that have the potential to help families, improve health outcomes and create templates that may decrease future paper work.

W3 *Conflict in Decision Making: How Much is Due to Genuine Differences in Values? (will be repeated)*

Peter Laussen, Karen Breen-Reid, Dennis Scolnik

This workshop introduces clinicians to evidence-based communication strategies that can be integrated into their day to day clinical practice when working with patients and families. Inter-professional practitioners who attend this workshop will reflect on personal strategies they already use, seek strategies to effectively explore and understand family perspectives and needs. They will also have an opportunity to enhance their skills in building trusting relationships with children and their families.

W4 *Ethical issues in Children with Genetic Conditions Associated with Intellectual Disability: Parent Perspectives (will be repeated)*

David Chitayat, Ian Brown, Karen Blott

Parents of children with genetic disorders associated with intellectual disability face daily challenges in raising their children as well as caring for their other children and family. This session will review and discuss some of these parental ethical issues.

W5 *Concussion and Tracking Growth Trajectories: How Does Clinical Practice, Public Health, Ethics and Evidence Come Together? (will be repeated)*

Patricia Parkin, Ross Upshur

Participants will explore the intersection of clinical practice, public health, ethics and evidence. We will examine several common clinical topics in the care of children and youth, such as management of the adolescent with a concussion and monitoring growth and developmental trajectories in young children.

3:15 – 3:30 pm **Afternoon break**

3:30 – 4:30 pm **Sessions W1 – W5 are repeated**

4:35 – 5:05 pm **Panel discussion on questions arising from the day**
John Lantos, Rebecca Greenberg, Randi Zlotnik Shaul

5:05 pm **End of day 1**

Day 2: Thursday, April 30, 2015

8:00 – 8:50 am Registration & Breakfast

8:50 – 9:00 am Welcome and Introductions

Mark Feldman, Conference Chair

9:00 – 10:00 am Sydney Rosen Program in Child Development Lecture: **State of the Art: Treatments for Children with Cerebral Palsy**

Darcy Fehlings

There is growing evidence for treatments for cerebral palsy paired with enhanced interest in neural repair and plasticity. This talk will weave together evidence, research on neural mechanisms of action and practical clinical management tips for children with CP. The talk will focus on three treatments: Constraint Therapy, Botulinum Toxin and Virtual Reality Therapy/Interactive Computer Play.

10:00 – 10:20 am Morning break

10:20 – 11:50 am Concurrent morning sessions

(choose 1 from the list below)

T1 Alcohol and the Fetus – Conclusions, Consequences & Care

Gideon Koren, Michael Sgro

This session will cover the risks of alcohol exposure in pregnancy, methods to diagnose alcohol-exposed neonates and management issues of alcohol-exposed infants and children. *Eligible for RCPSC MOC 3 credits.*

T2 Diagnosed Developmental Delay? What Can be Done in the Office Setting?

Chaya Kulkarni

This session will cover management of developmental delays in infants and toddlers, the impact of lengthy wait times on the optimal development and strategies to overcome barriers to intervention services for patients. *Eligible for RCPSC MOC 3 credits.*

T3 Feeding Too Tough? A Practical Approach to the Management of Failure to Thrive Without Clear Organic Pathology

Alissa Steinberg, Sarah Schwartz

Feeding a baby seems to be a simple enough task until it goes wrong. This session will illustrate the common themes in a failure to thrive population seen for assessment in a tertiary paediatric hospital and will provide practical strategies for early and effective intervention. *Eligible for RCPSC MOC 3 credits.*

T4 Trauma, Paediatric Post-traumatic Stress Disorder and Developmental Trauma Disorder

Diane Benoit

Nearly 70% of children experience at least one traumatic event by age 16 and a substantial proportion of them consequently develop Post-Traumatic Stress Disorder (PTSD) or Developmental Trauma Disorder (DTD). This presentation uses audio and video recorded vignettes of parent-child interactions to illustrate aspects of current knowledge on the prevalence, diagnosis, burden and sequelae of PTSD and DTD emphasizing 'red flags', screening, interviewing techniques, general principles of intervention and resources for parents and children. *Eligible for RCPSC MOC 3 credits.*

T5 T5: Paediatric Plastics: "Cosmetic" Surgery for Kids

Ronald Zuker, Joel Fish, David Fisher, Christopher Forrest, Karen Wong

In this session, paediatric plastic surgeons will present their approach to cosmetic surgical procedures in children. A wide variety of conditions affecting the face (ears, nose, mouth), breast (male and female), benign lesions mainly affecting the skin and scars as a result of trauma and burns will form the basis for a brief overview and suggestions regarding the referral process and timing of referral, as well as an overview of the surgical procedure itself, its timing and implications for the child and family.

11:50 – 1:00 pm Lunch

1:00 – 2:30 pm Concurrent afternoon sessions

(Choose two 1.5 hour sessions or one 3 hour session from the list below; sessions will repeat at 2:50 pm)

T6 The World is Getting Smaller: Paediatric Travel Medicine and Keeping the Child Traveler Healthy (will be repeated)

Shaun Morris, Ray Lam, Michelle Science

This session will cover changes in travel patterns of children, risks for children for common travel related illness and major serious travel related illnesses and conditions. Preventative measures and approaches to illness in the returned traveler will also be reviewed. *Eligible for RCPSC MOC 3 credits.*

Day 2: Thursday, April 30, 2015

T7 *Dermatology in the Neonate and Infant (will be repeated)*

Miriam Weinstein, Elena Pope, Irene Lara-Corrales

This session will provide an overview of common and uncommon rashes seen in the neonatal period, focusing on immediate recognition and management. *Eligible for RCPSC MOC 3 credits.*

T8 *A Multidisciplinary Approach to the Care of the Child with Chronic Pain (will be repeated)*

Stephen Brown, Fiona Campbell, Anne Campos, Jennifer Tyrrell, Danielle Ruskin

Selected members of the SickKids Chronic Pain Team will review the multidisciplinary approach to the care of children with chronic pain including the use of cannabinoids in medicine and specifically in the paediatric patient with chronic pain.

T9 *What to do When First Line ADHD Treatment Doesn't Work? (will be repeated)*

Alice Charach, Jennifer Crosbie

This session will address common reasons for lack of effectiveness when using first line medication or behavioural interventions for ADHD: 1) unidentified comorbidities, 2) suboptimal treatment with medications, 3) suboptimal interventions in classroom or home environments. Academic, language and cognitive concerns and how to support home-school collaboration will be emphasized. *Eligible for RCPSC MOC 3 credits.*

T10 *Tips and Tricks for Paediatric Procedures (3 hour session, max attendance 20)*

Claudio Fregonas, Trent Mizzi, Olivia Ostrow and Suzan Schneeweiss

Minor procedural skills are a necessary part of emergency medicine practice in children, but can be challenging to manage. What is the best way to remove a nasal foreign body in a two year old? Is there a painless way to reduce paraphimosis or rectal prolapse in a child? How do I replace a g-tube? Is there an alternative to urinary catheterization in a neonate? In this session we will discuss common procedures and provide tips and tricks for effective management. Participants will also have an opportunity to practice skills in a simulated setting. *Eligible for RCPSC MOC 3 credits.*

T11 *The Physical Examination for Paediatric Office Diagnosis of Autism Spectrum Disorder (3 hour session, max attendance 12)*

Jessica Brian, Tara Kennedy

Participants will learn an office-based tool derived from the Autism Diagnostic Observation Schedule to allow a semi-structured observation and interaction with children suspected of being on the autism spectrum. This physical examination equivalent, combined with a focused history, will allow more reliable office-based diagnoses of Autism Spectrum Disorder (ASD) using DSM criteria.

2:30 – 2:50 pm Afternoon break

2:50 – 4:20 pm Sessions T6-T9 are repeated

4:20 pm End of day 2

Day 3: Friday, May 1, 2015

8:00 – 8:50 am Registration & Breakfast

8:50 – 9:00 am Welcome and Introductions

Mark Feldman, Conference Chair

9:00 – 10:00 am Keynote: **At-Risk Adolescents: What the Brain Tells (and doesn't tell) Us**

Marshall Korenblum

Adolescence is a time of increased novelty-seeking and risk-taking. Why? Is this a good thing or a bad thing? Stay tuned for advice on how to assess and manage unbridled behaviours.

10:00 – 10:20 am Morning break

10:20 – 11:50 am Concurrent breakout sessions

(choose 1 from the list below):

F1 *Current Care Plans for Children with Severe Aggression*

Evdokia Anagnostou, Brendan Andrade

The session will give an overview of biological, individual, peer, family and community based factors that contribute to aggressive behaviour and helpful interventions. Using a cognitive-behavioural treatment as an example, program modules that build children's emotional, cognitive and social problem-solving skills will be described. In the case of children with neurodevelopmental disabilities, such as ASD or intellectual disability, we will review principles of behavior analysis and the evidence for medication use in this population.

Day 3: Friday, May 1, 2015

F2 *Management of Paediatric and Adolescent Headaches*

Daune MacGregor, Jonathan Gladstone, Christine Lay

This session will highlight the different primary and secondary causes of chronic headaches, diagnostic issues in migraine and other headache complaints (including information on the genetics of migraine and diagnostic panels), as well as approaches to treatment including lifestyle and pharmacologic interventions.

F3 *Everything You Wanted to Know About Neonatology, But Were Afraid to Ask*

Panel discussion led by Andrew James with Chris Tomlinson, Jennifer Young and Mike Dunn

Participants will be able to submit their questions online prior to the attending the session.

F4 *Paediatric Informatics: How to Harness Technology in your Paediatric Practice*

Jonathan Pirie, Frank Wang

This interactive and 'hands on' workshop will allow participants the opportunity to use mobile devices to access medical information, help with your medical workflow and generate ideas for future mobile solutions.

F5 *Managing the Septic Infant and Child in 2015*

Deborah Schonfeld, Melissa Parker

This workshop will be a case-based interactive session on severe sepsis and septic shock in children. We will review existing paediatric guidelines for care, as well as explore current barriers and potential solutions to optimizing treatment in the emergency department and inpatient settings. *Eligible for RCPSC MOC 3 credits.*

11:50 – 1:00 pm Lunch**1:00 – 2:30 pm** Concurrent breakout sessions

(Choose two 1.5 hour sessions or one 3 hour session from the list below; sessions will repeat at 2:50 pm)

F6 *Should I call Rheumatology? When to Investigate Common Signs and Symptoms in Your Practice (will be repeated)*

Ron Laxer, Deborah Levy, Shirley Tse

Signs and symptoms of musculoskeletal and autoimmune diseases are common in daily practice. This session will review the approach to investigation and management of children and adolescents with a positive anti-nuclear antibody (ANA) test, Raynaud's phenomenon, growing pains and other non-inflammatory musculoskeletal pain. *Eligible for RCPSC MOC 3 credits.*

F7 *Bent or Brittle? Beware! Bone Health for Children (will be repeated)*

Etienne Sochett, Jonathan Maguire

Normal bone health involves a complex interaction between fetal health, bone remodeling, modeling, linear growth, puberty, nutrition and exercise. In this session we will cover how these core physiological processes impact on bone health and how disturbances in any single or several of these processes can impair bone health. We will also cover how to integrate the clinical history and examination with the investigative tools to reach a diagnosis. An approach to the child with frequent fractures will be suggested. Guidelines will be provided for ongoing bone health monitoring and when to refer to the Bone Health Clinic. The basics of bone health maintenance will be discussed as well as established and on the horizon therapies.

F8 *Recognizing and Responding to Child Abuse Concerns (will be repeated)*

Michelle Shouldice

This interactive, case-based session will illustrate presentations of a child's physical abuse which are commonly encountered in the office and emergency department setting. A practical approach to assessment and management of these cases, including diagnosis, communication with caregivers, and practical tips for reporting concerns to a child welfare and managing the situation in the clinical setting will be provided.

F9 *Bugs and Drugs 2015 (will be repeated)*

Ari Bitnun, Ian Kitai, Valerie Waters

This session will cover approaches to empiric antibiotic therapy for common community-acquired paediatric infections, rates of resistance to commonly used antibiotics in Canada, and mechanisms of antibiotic resistance and how it impacts selection of empiric antibiotic therapy. *Eligible for RCPSC MOC 3 credits.*

F10 *Precocious and Delayed Puberty (will be repeated)*

Mark Palmert, Jennifer Harrington

For the child who is referred with either early or late secondary sexual characteristics, the clinical challenge for physicians is to decide what (if) further evaluation is needed and when therapeutic intervention is warranted. In this session, using clinical vignettes, we will outline an approach to the diagnosis and management of precocious and delayed puberty. *Eligible for RCPSC MOC 3 credits.*

2:30-2:50 pm Afternoon break**2:50-4:20 pm** Sessions F6-F10 are repeated**4:20 pm** End of day 3

Day 4: Saturday, May 2, 2015

7:30 – 8:20 am Registration & Breakfast

8:20 – 8:30 am Welcome and Introductions

Mark Feldman, Conference Chair

8:30 – 9:30 am Keynote: Best Papers of 2014

Jeremy Friedman

Who has enough time to sift through all of the new published research? This session will highlight some of the most important and interesting new findings in Paediatrics in 2014.

9:30 – 9:50 am RICE vs METH for Minor Injuries

John Philpott

A new way to look at a familiar injury: is METH the latest rage or is RICE still the best recipe? This session will review basic sport-related pathophysiology as well as common and not so common treatments.

9:50 – 10:10 am Managing the HIV exposed infant in Canada

Ari Bitnun

This session will cover: (a) the approach to management of infants born to HIV-infected mothers and infants born to mothers of unknown HIV status with risk factors for HIV, including when to consider combination antiretroviral therapy; (b) the short and long term toxicities of antiretroviral medications following fetal and neonatal exposure; (c) breast feeding controversies in the HIV context.

10:10 – 10:30 am RCPSC credits for CE made EASI(er) – how to get your MOC 3

Mark Feldman

Starting with your next RCPSC MOC-cycle, credits in all three categories will be required. Paediatric Update is the only large paediatric conference in Canada to offer an opportunity to efficiently acquire MOC 3 credits through knowledge assessment.

10:30 – 10:50 am Morning break

10:50 – 11:10 am That's No Ear Infection! STI Management Guidelines – a Primer for Paediatric Providers

Ashley Vander Morris

This session will provide practitioners with the most up-to-date treatment guidelines for common sexually transmitted infections, and will review recommended approaches to patient follow-up and partner notification.

11:10 – 11:30 am Emerging Substances of Abuse

Trisha Tulloch

This session will cover current trends in adolescent substance use, new substances of abuse and the clinical implications of their use on adolescent health.

11:30 – 11:50 am FODMAP: Another Diet for Upset Guts?

Peggy Marcon

Modification to diet has long been part of the suggested management in IBS. What is the FODMAP diet? This session will cover the rationale and evidence behind the diet, as well as implementation strategies.

11:50 – 12:10 pm When Should Chest Pain Give You Palpitations?

Emilie Jean St. Michel

This session addresses the fears generated by paediatric chest pain. It will use patient cases to go through important diagnoses and the associated findings that a primary care physician should keep in mind when evaluating a child with chest pain.

12:10 – 12:30 pm Borrella in the "Lyme Light": Epidemiology and Diagnosis of Lyme Disease

Samir Patel with Shaun Morris

This session will cover the epidemiology of, clinical presentation of and the role of laboratory testing in the diagnosis of Lyme Disease.

12:30 – 12:40 pm Wrap up

12:40 pm End of conference

Conference Speakers

Evdokia Anagnostou MD

Senior Clinician Scientist, Bloorview Kids Rehabilitation Hospital

Brendan Andrade PhD, C. Psych

Clinician-Scientist, Centre for Addiction and Mental Health, Child Youth and Family Service

Michael Apkon MBA, MD, PhD

President and CEO, The Hospital for Sick Children

Ari Bitnun MD, MSc, FRCPC

Staff Physician, Infectious Diseases, The Hospital for Sick Children

Diane Benoit MD, FRCPC

Staff Psychiatrist, The Hospital for Sick Children

Karen Blott

SickKids parent

Karen Breen-Reid RN, BScN, MN

Manager, Inter-professional Education, The Hospital for Sick Children

Jessica Brian PhD

Clinician Investigator, Psychologist, Holland Bloorview Kids Rehabilitation Hospital

Ian Brown

SickKids parent, author, feature writer with the Globe and Mail

Stephen Brown MD, FRCPC

Staff Anesthesiologist, Medical Director Chronic Pain Clinic, The Hospital for Sick Children

Fiona Campbell BSc, MD, FRCA

Staff Anesthesiologist, The Hospital for Sick Children

Anne Campos BSc, PT

Physical Therapist, Chronic Pain Clinic, The Hospital for Sick Children

Alice Charach MSc, MD, FRCPC

Medical Director, Collaborative and Transitional Age Care, Department of Psychiatry, The Hospital for Sick Children

Lee-Ann Chapman BA (Hons), JD

Triage Lawyer, Family Legal Health Program, The Hospital for Sick Children

David Chitayat MD, FRCPC,

FCCMG, FABMG, FACMG
Staff Physician, Clinical and Metabolic Genetics, The Hospital for Sick Children

Ronald D. Cohn MD, FACMG

Chief, Clinical and Metabolic Genetics, The Hospital for Sick Children

Jennifer Crosbie PhD, C. Psych

Psychologist, Department of Psychiatry, The Hospital for Sick Children

Malini Dave MD, FAAP, FRCPC

Pediatrician, Paediatric Emergency Medicine, The Hospital for Sick Children

Michael Dunn MD, FRCPC

Neonatologist, Sunnybrook Health Sciences Centre

Darcy Fehlings MD, MSc, FRCPC

Physician Director, Child Development Program, Senior Clinician Scientist, Holland Bloorview Kids Rehabilitation Hospital

Joel Fish MD, FRCSC

Medical Director, Burn Program, Staff Surgeon, Division of Plastic and Reconstructive Surgery, The Hospital for Sick Children

David Fisher MD, FRCSC, FACS

Medical Director and Surgeon, Cleft Lip and Palate Program, The Hospital for Sick Children

Christopher Forrest MD, MSc,

FRCSC, FACS
Chief, Division of Plastic & Reconstructive Surgery, The Hospital for Sick Children

Mark Feldman MD, FRCPC

Paediatrician, The Hospital for Sick Children and St. Joseph's Health Centre

Diane Flacks

SickKids parent, writer, actor

Jeremy Friedman MD, FRCPC

Associate Chair, Clinical Programs, Paediatrics, The Hospital for Sick Children

Claudio Fregonas MD, FRCPC

Staff Physician, Paediatric Emergency Medicine, The Hospital for Sick Children

Jonathan Gladstone MD, FRCPC

Neurology Specialist, Cleveland Clinic Canada

Ronald Grant MD, FRCPC

Chair, Research Ethics Board, Staff Physician, Haematology/Oncology, The Hospital for Sick Children

Rebecca Greenberg RN, PhD

Bioethicist, The Hospital for Sick Children

Jennifer Harrington MD

Endocrinology, The Hospital for Sick Children

Andrew James MSc, MBChB, FRACP, FRCPC

Staff Neonatologist, The Hospital for Sick Children

Emilie Jean-St-Michel MDCM, FRCPC

Staff Cardiologist, The Hospital for Sick Children

Tara Kennedy MD, PhD, FRCPC

Clinical Leader, Paediatric Autism Rehabilitation Services, Stan Cassidy Centre for Rehabilitation

Ian Kitai MB, BCh, FRCPC

Staff Physician, Infectious Diseases, The Hospital for Sick Children

Marshall Korenblum MD, FRCPC,

Dip.Child Psych
Psychiatrist-in-Chief, Hincks-Dellcrest Centre for Children

Gideon Koren MD, FRCPC

Director, Motherisk Programs, Clinical Pharmacology and Toxicology, The Hospital for Sick Children

Chaya Kulkarni BAA, MEd, Ed.D

Director, Infant Mental Health Promotion, The Hospital for Sick Children

Irene Lara-Corrales MD, MSc

Staff Paediatrician, The Hospital for Sick Children

Ray Lam NP

Nurse Practitioner, Infectious Diseases, The Hospital for Sick Children

John D. Lantos MD

Director of Paediatric Bioethics;
Professor of Paediatrics, University
of Missouri-Kansas City School of
Medicine

Peter Laussen MB, BS, FCICM

Chief, Critical Care Medicine, The
Hospital for Sick Children

Ron Laxer MD, CM, FRCPC

Staff Rheumatologist, The Hospital
for Sick Children

Christine Lay MD, FRCPC

Director, Centre for Headache,
Women's College Hospital

Leo Levin MD, FRCPC

Community Pediatrician,
Markham, Ontario
Director, Health Services, Children's
Aid Society of Toronto

Deborah Levy MD, MS, FRCPC

Staff Rheumatologist, The Hospital
for Sick Children

Daune MacGregor MD, MBA, DCH, FRCPC

Staff Neurologist, The Hospital
for Sick Children

Jonathan Maguire MD, MSc, FRCPC

Pediatrician and Scientist, Li Ka Shing
Knowledge Institute, St. Michael's
Hospital

Margaret (Peggy) Marcon

Ronald Zuker MD, FRCSC, FACS, FAAP

Staff Physician, Division of Plastic
Surgery, The Hospital for Sick Children

Registration Information and Fees

Important Dates

January 6, 2015: online registration opens	April 20, 2015: last day to complete the online pre-conference test(s) to obtain RCPSC MOC 3 credits
March 26, 2015: last day to book hotel at conference rate	April 20, 2015: last day to cancel your registration (less a handling charge – visit the website for full details on our cancellation policy).
April 1, 2015: early bird registration deadline	April 26, 2015: last day to register online
April 1, 2015: Last to register to be eligible to obtain RCPSC MOC 3 credits (visit www.sickkids.ca/puc for details)	

Registration: www.sickkids.ca/puc Contact: info.puc@sickkids.ca

Conference Fees * Early Bird Rate (deadline: April 1, 2015)

Pass Type	Physician	Non-physician, resident or trainee
1 day pass Sat only	\$150*/\$175	\$120*/\$140
1 day pass (no Sat)	\$275*/\$325	\$220*/\$260
2 day pass A (includes Sat)	\$425*/\$500	\$340*/\$400
2 day pass B (no Sat)	\$550*/\$650	\$440*/\$520

3 day pass B (no Sat)	\$825*/\$900	\$660*/\$720
Full conference (4 days)	\$850*/\$925	\$680*/\$740

Location and Directions

The Paediatric Update Conference is held in the Toronto Region Board of Trade (TRBOT), which is located inside the First Canadian Place Building at street level.

First Canadian Place Building Entrances:

- Adelaide street entrance: 77 Adelaide Street West – this is the closest entrance to the TRBOT. This entrance is not wheelchair accessible.
- King street entrance: 100 King Street West – this entrance is wheelchair accessible
- Bay street entrance: 320 Bay Street – this entrance is not wheelchair accessible

Subway: The First Canadian Place Building is in between St. Andrew and King stations on the Yonge/University line

If you are coming from the subway or underground parking lot, the easiest way to find the Toronto Region Board of Trade is to go out to street level and enter the First Canadian Place Building from the 77 Adelaide Street West entrance.

Accommodations

Our host hotel this year is the Sheraton Centre Toronto, which is conveniently located across the street from the conference location at the Toronto Region Board of Trade.

To book at the special conference rate of \$199, please call Sheraton Reservations at **1-888-627-7175** and ask for the **SickKids Paediatric Update 2015** special rate. This rate will be available 3 days prior and 3 days after the conference dates. To guarantee your special rate, please book your reservation by Thursday, March 26, 2015.

Please save the date for next year's conference: **May 11-14, 2016**

Cancellation Policy

You can cancel your registration until Monday, April 20, 2015 less a handling fee of up to \$100 for a full conference registration. After this date no refunds will be granted, but you can request an alternate registrant. Please visit the website to review the full cancellation policy.
