The LINNC SEMINAR takes form!

COURSE DIRECTORS

Jacques
Moret,
MD

Michel
E. Mawad,
MD

Laurent
Spelle,
MD

Within a specialty as vibrant and in constant evolution as our own, one of greatest challenges is to keep abreast of changes in information, technique and practice which seem to occur every week. Working together, the LINNC community has responded to this challenge with the creation of unique pedagogical tools specially designed to reflect the state of the art in interventional neuroradiology and neurosurgery.

In 2015, in addition to the annual LINNC PARIS COURSE (which will be held on June 22-24, 2015 in Paris, Carrousel du Louvre) we propose today the latest fruits of our efforts with a new educational tool: the **LINNC SEMINAR**.

The first one, **the US edition will be held in New York City on Friday, March 27th and Saturday, March 28th, 2015**. An exciting new course born out of the same spirit of innovation and experience that characterizes LINC Houston, LINNC Paris and LINNC online.

Why call it a seminar?

There is no accident in our choice of terms and the architecture of this new course leaves nothing to chance.... except the challenge of your interaction and participation. In choosing to create a seminar, we look towards two goals: first, **to ensure the quality of exchange between the lecturers and the participants** and second, **to ensure the presentations lend themselves to the highest quality of interaction and knowledge**. This second point led us to build the scientific program of LINNC Seminar – US edition **around pre-recorded cases**.

These cases, which will come from the Neurol Center Beaubien in Paris - France, the St. Luke's Episcopal Hospital, Houston - TX and the UPMC Stroke Institute, Pittsburgh - PA, have been carefully chosen to create illuminating discussions using the widest selection of patients and indications as well as the largest variety of technical equipment in use today.

Let's review some of the advantages that working with pre-recorded cases offer:

- By being pre-recorded, **the presenter can lead the discussion** where it needs to go, sensing and following the needs of the audience as they arise.
- This is also true for pre-recorded cases **showing exceptional or rare situations where the success of the treatment has been shown to be effective...** offering participants the possibility of sharing clinical expertise.
- The careful choice of these cases **allow us to present situations where complications and the way they are handled can be most effectively illustrated**, regardless of whether

the chosen approach was the correct or incorrect way to handle the clinical problem; all is part of a creative and open learning experience.

- Carefully choosing cases in advance using the most sophisticated imaging systems available allow us to demonstrate in the greatest detail the practical application of these systems as well as the clinical benefits of their use.

Beyond the choice of subjects and their presentation to the participants, **using pre-recorded cases also offers something which is inestimable – the actual experience and presence of the operator who performed the case**. You will have the specialists themselves before you, discussing their every therapeutic gesture and act.

This, of course, has required a certain degree of preparation and for months we have been working on identifying those cases that best fit the stringent requirements of our pedagogy. These recorded case sessions will include discussion by an expert panel concentrating on **specific topics such as: aneurysms; AVMs in general; specific AVMs such as of those of the marrow (spine and spinal cord), spinal dural AVMs; the management of complications, cerebral stroke, and also the possible discussion on percutaneous techniques**.

Your cases and your participation count

We cannot emphasize how valuable and essential your contribution is to this new LINNC Seminar. It is your participation, your willingness to share with us your own cases and concerns is one of the foundations of our pedagogy. **At the LINNC Seminar – US edition, this interaction will be underlined each day with the presentation of the best cases submitted by you, the participants**. We urge you to submit them now (www.linnc.com) and become an important part of the program yourselves!

As always, **we are dedicated to offering you an educational experience that can have an immediate and positive impact on your daily practice**. Thus the idea of creating this new "seminar" is in keeping with our overall commitment to provide you with the highest quality of clinical and theoretical knowledge and information in a forum that emphasizes interactivity and encourages your participation.

We **look forward to seeing you in New York in the spring of 2015** for a new adventure in interventional neuroradiology and neurosurgery education.

Sincerely,

LINNC SEMINAR 2015 - US EDITION

PRELIMINARY PROGRAM

FRIDAY, MARCH 27, 2015		SATURDAY, MARCH 28, 2015	
08:00	ATTENDEES CASES Presentation of the best cases submitted by attendees	08:00	ATTENDEES CASES Presentation of the best cases submitted by attendees

GENERAL INFORMATION

LINNC SEMINAR 2015 - US EDITION

Dates: Friday, March 27th and Saturday, March 28th, 2015

Meeting Location: Hudson Theatre at Millennium Conference Center.

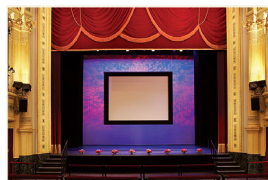

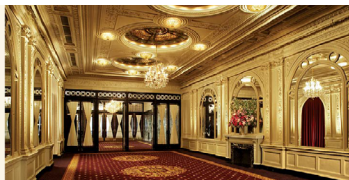

Accommodation: Millennium Broadway Hotel.

Address: Times Square - 145 West 44th Street, New York, NY – USA.

THE HUDSON THEATRE

Situated between the Millennium Broadway Hotel and the Premier Hotel, it provides an ideal venue in a prime location. Not only is it poised for the vibrancy of Times Square, but it's **the second-oldest house on Broadway**. Accented by an elegant and classical interior, it retains many period features evoking **the splendor of 1903**.

The Hudson Theatre underwent a renovation in 2004, and it now provides the perfect venue for New York City meetings. It boasts the very latest technological equipment, but retains much of the charm of its opening night.

PACKAGE REGISTRATION & ACCOMMODATION

Rooms available on March 26th, 27th and 28th, 2015

	SAVE \$22	SAVE \$64	SAVE \$96
Early bird rate - Until January 18, 2015	Registration + 1 night	Registration + 2 nights	Registration + 3 nights
