

Pediatric Kaleidoscope

Course Description

This Pediatric Kaleidoscope conference is in honor of the career of J. Carlton Gartner, MD.

Learning Objectives

Upon completion of this program, participants will be better able to:

- Reconsider the potential role of antidiuretic hormone in pathophysiology of water intoxication in infants 2 to 6 months of age.
- Adopt a pastoral care perspective in discerning the role of mothers in the etiopathogenesis of water intoxication in normal infants.
- Identify the trends that have taken place over time in our educational programs for residents and for those in practice.
- Project how all of us will likely keep up with new knowledge in the future.
- Discuss the journey of the Pediatric Hospitalist movement.
- Determine attributes needed and not needed for pediatric leadership.
- Recognize and illustrate principles designed to enable better pediatric leadership.
- Identify how to appropriately use diagnostic tests for Lyme disease.
- Describe the management of chronic symptoms for Lyme disease.
- Discuss the dynamics of the Philadelphia measles epidemic of 1991.
- Examine the history of religious exemptions to vaccination and how those exemptions were handled by public health.
- Provide an example of how to use contemporary media to teach child development.
- Discuss some major features of school age development.
