Current Issues in Anatomic Pathology

May 21-23, 2015

This annual course addresses a wide range of topics in anatomic pathology and explores new and evolving areas in the diagnosis and analysis of disease. It aims to provide the latest practical and theoretical information that will aid the practicing pathologist in solving those problems most often encountered in the anatomic pathology laboratory.

An audience response system will facilitate questions and discussion. A complete course syllabus will be provided for all participants. Participants will be able to register for either the entire three-day meeting or for any combination of individual one-day blocks.

OBJECTIVES

The principal objective of this activity is to identify areas of diagnostic difficulties and challenges in everyday surgical pathology and cytopathology practice, and to provide expert insight on selected topics through different educational formats. Educational experience is further enhanced through a collegial contact and one-on-one interaction throughout the course. As identified through recent publications and other data gathering efforts, the topics selected each year reflect areas in which substantial information and progress has been made. The topics of discussion also focus on areas in which there is significant difficulty in interpretation of pathological features. In general terms, we expect that at the end of this course, the participants will:

- Identify common mistakes and pitfalls in the diagnosis of specific diseases as listed in the course curriculum in everyday surgical pathology.
- Recognize mimickers of specific diseases in each specialty and learn to interpret special studies that will allow easier differential diagnosis.
- Learn the pertinent histopathological characteristics of diseases to allow unequivocal diagnosis.
- Incorporate new and additional components of the pathology report that will improve its clinical value.
- Put into practice recent changes/modifications in the pathological classification of diseases or lesions.
- Be more helpful to the clinicians or surgeons in the management of patients with these diseases.

31ST ANNUAL UCSF

Current Issues in Anatomic Pathology Cytology Seminar

CYTOLOGY SEMINAR

Enrollment in this seminar is limited to **18 persons** and will be determined on a first-come, first-served basis. The seminar will be held on the UCSF San Francisco VA Medical Center Campus.

Shuttle service will be provided between the Hotel Nikko and the San Francisco VA Medical Center.

Seminar Registration Fee: **\$295**

Please call the registration office (415-476-5808) to verify space is available before sending payment for the Cytology Seminar.

Seminar Faculty

Ronald Balassanian, MD – Associate Professor of Pathology

Kirk Jones, MD – Professor of Pathology

Laura Tabatabai, MD – Professor of Pathology; Seminar Chair

Poonam Vohra, MD – Assistant Professor of Pathology

EDUCATIONAL OBJECTIVES

To present the audience a hands-on experience in diagnostic problems in everyday cytopathology practice and an update on recent developments in the use of special techniques in cytopathology. At the end of the cytopathology course, the learner will be able to identify common problem areas in cytopathology practice, recognize potential pitfalls and develop a differential diagnosis and a management plan. The learner will be able to identify the practical benefit of special techniques.
