The 8th Royal Marsden Pain and Opioid Conference

Dear Colleagues,

It is a great pleasure once again to invite you to the 8th Royal Marsden Pain and Opioid Conference. This follows on from last year's very successful event.

Opioids still form the mainstay of many types of pain for both cancer and non-malignant pains. Although there is evidence for their effect, opioids also are associated with significant side effects in the short and long term. This day will examine these varied aspects of opioids from targeting multiple receptors to a detailed examination of adverse gastrointestinal effects. We will also hear up to date reviews on opioids for non-malignant pain, addiction, the use of opioids at end of life and in paediatric practice from experts in these fields. The programme aims to update practitioners with useful and informative facts that will keep their opioid knowledge fresh and contemporaneous.

We do hope you will be able to join us for this exciting and challenging event.

Kind regards,

Dr. Paul Farquhar-Smith
