

Madrid

9th IVF Preceptorship: current practice in the 21st century

24-25 September 2015 - Madrid and Alicante, Spain

Alicante

9th IVF Preceptorship: current practice in the 21st century

Aim

For the 9th edition, this twin site live educational course will be focused on the role of LH in controlled ovarian stimulation, recurrent implantation failure, SET (single embryo transfer) and new laboratory techniques and equipment for optimising IVF procedures. The programme is designed to allow for sharing different experiences and address controversial topics and “burning” questions in scientific and clinical topics that will be discussed during interactive sessions using a voting system. Each lecture is followed by specific case studies in working groups which will provide participants with both up-to-date knowledge and the opportunity to share their experiences with each other and with speakers. During the working groups, participants will propose specific take-home messages for each topic which will be compared and discussed during the plenary. A video session will also be used to bring the Madrid and Alicante participants together in these discussions.

Learning objectives

By attending this live educational course, participants will be able to:

- Identify current evidence-based recommendation to achieve the best management of LH supplementation in stimulation protocols
- Learn the best embryo selection technique
- Understand the importance of luteal phase support and treatment possibilities
- Explore current tools in male infertility diagnosis and management
- Manage recurrent implantation failure

Target audience

This live educational course is designed for a small group of young clinicians, physicians and embryologists working in assisted reproductive medicine who want to acquire up-to-date information for improving their current clinical practice.

Format

This twin site event will run simultaneously at the two IVI Clinics of Madrid and Alicante. Participants will enjoy presentations from faculty members in person and via satellite link from the other centre. The faculty, composed mainly of local experts from both IVI Clinics – as well as some international experts – will be divided among the two venues. Advantages of a twin site event are the opportunity for exchange and debate with a larger group of young clinicians while also channeling expertise from two world-class IVI Clinics.

Accreditation

An application will be made to the EACCME® for CME accreditation of the EXCEMED: **“9th IVF Preceptorship: current practice in the 21st century”** to be held on 24-25 September 2015 in Madrid and Alicante, Spain.

EXCEMED adheres to the principles of the Good CME Practice Group (gCMEp).

Main topics

24 - 25 September 2015

- Lifestyle behaviours in women undergoing IVF
- Predictive biomarkers for COS
- The choice of the best stimulation protocols in normal and poor responders
- Prevention of OHSS: different strategies
- New technologies to identify the most viable oocyte
- The role of IMSI in ART
- New technologies to identify embryos with the highest implantation potential

General information

Venue

This live educational course will take place at:

➤ **IVI-MADRID**

Avenida del Talgo 68
Aravaca - Madrid, Spain

➤ **IVI-ALICANTE**

Avenida Denia, 111
3015 Alicante, Spain

Language

The official language of this live educational course will be English.

Registration fee

➤ The registration fee is € 350,00.

This fee includes:

- Scientific sessions
- Coffee breaks and luncheons
- Dinner on 24 September 2015
- Educational materials
- Certificate of attendance

➤ Registration fee without dinner is € 270,00.

➤ Registration fee for young physicians,
(up to 35 years old), without dinner is € 250,00.
