

IMAGING WARM-UP IN COSTA RICA

DECEMBER 6–11, 2015 / Playa Herradura, Puntarenas

This week-long course is designed for radiologists in clinical practice, and will provide an overview and updates on clinically relevant topics in diagnostic imaging, as well as an up-to-date assessment of the clinical uses of imaging modalities such as CT, MRI, sonography, and imaging-guided procedures in the diagnosis of varied diseases. Ample time will be available for informal discussions with the course faculty.

At the completion of this course, the attendee should be able to:

1. Recommend imaging approaches to traumatic and emergent conditions in adults and children, including conditions of the brain, cardiovascular, abdominal and musculoskeletal systems;
2. Identify screening markers for oncologic conditions, including lung cancer and mediastinal imaging, abdominal hepatic malignancy and brain tumor imaging;
3. Recognize common pitfalls in the imaging of critically ill patients, including imaging after loco-regional therapies, neurovascular pathology and patients with suspected pulmonary embolism;
4. Differentiate between common and uncommon imaging manifestations of chronic disease, including injuries of the wrist and shoulder, vascular disease and prostate imaging;
5. Implement protocols for new and developing topics, including non-accidental trauma, radiographic contrast material guidelines and imaging of femoral-acetabular impingement.

Accreditation

The University of California, San Francisco School of Medicine (UCSF) is accredited by the Accreditation Council for Continuing Medical Education (ACCME) to provide continuing medical education for physicians.

UCSF designates this educational activity for a maximum of **24.5 AMA PRA Category 1 Credits™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

Total credits are inclusive of 7.75 in CT, 10.75 in MR and 1.25 in Ultrasound.

This educational activity meets the requirement under California State Assembly Bill 1195, continuing education and cultural and linguistic competency.

Puntarenas, Costa Rica

Puntarenas, with beautiful coastal beaches, islands and waterfalls on the western coast of the country, is one of the most popular tourist destinations throughout Central America. Costa Rica has more ecological preservation, sight-seeing and recreational activities per square mile than any other country in the world. More than a quarter of the country is dedicated to national parks and wildlife preserves, while tropical rain forests, active volcanoes, miles of unspoiled beaches and climatic zones provide visitors with an incredible travel experience.
