Esthetic Full-Mouth Implant Reconstruction Course Series

Advanced Prosthodontic Techniques for Challenging Patients

Limited Attendance
Hands-On

Module I - III:
Friday - Sunday, July 21 - 23, 2017
9:00am - 5:00pm

★ *Life-Long Tradition and Excellence* ★

SYNOPSIS

Individual patient conditions may present challenges that are not readily addressed in a generic treatment approach. Some of these include patients who are about to lose their entire dentition but refuse to remain without fixed restorations throughout treatment. Other patients present with phonetic difficulties, lack of tongue space or poor adaptability to new prostheses. Additional challenges involve edentulous patients who present with pre-existing implants in severely compromised positions. These conditions require customization of the treatment plan to address specific patient needs. The appropriate treatment sequence for these challenging conditions will be presented with attention to details that are critical to a successful reconstruction with proper esthetics and function.

Modules I & II: Lectures

- Diagnosis of advanced conditions
- Advanced treatment planning and sequencing
- Transitional implants to support fixed full-mouth restorations
- Advanced framework designs for esthetics and maintainability
- Restoration of implants with extreme angulations
- Management of patients with advanced bruxism and parafunction
- The Duplicate Backup Prosthesis concept and design
- Laboratory techniques and procedures
- Tools for supervising and coordinating laboratory work
- Management of complications
- Surgical considerations

Module III: Hands-On Workshop (Limited Attendance)

Implant Verification Cast and Impression

Faculty: Harel Simon, DMD;
Joseph Field, DDS; Take Katayama, CDT

In this unique simulation, participants will learn to meticulously create a full-arch impression coping assembly and a verification cast that accurately represent the patient's condition.

The verification cast is designed to be sent to the laboratory as a precise prescription for implant framework fit. The technician can use it to form an accurate framework and cut and solder predictably without the need to see the patient again; thus eliminating the need for intra-oral solder indices and multiple framework trials. This is the core technique to establish accurate CAD/CAM frameworks with predictable passive fit. It provides direct control over laboratory made frameworks, simplifies the treatment and enhances the predictability of implant reconstruction.

FACULTY

Harel Simon, DMD

Dr. Harel Simon received his DMD degree from the Hebrew University, Jerusalem, Israel and his specialty certificate in advanced prosthodontics from UCLA School of Dentistry. Dr. Simon has conducted research, published and lectured nationally and internationally on esthetics and implant prosthodontics. He has been a featured speaker at the Academy of Osseointegration, Academy of Prosthodontics, American College of Prosthodontists, American Academy of Fixed Prosthodontics and the Pacific Coast Society of Prosthodontics. Dr. Simon has coauthored the 2nd edition of the bestseller book *Dental Implant Complications* (Wiley-Blackwell). He currently serves on the editorial review board of various scientific publications including the *Journal of Prosthetic Dentistry* and *Quintessence International*. Dr. Simon practices in Beverly Hills, California and is a clinical associate professor at the Herman Ostrow School of Dentistry of University of Southern California. Dr. Simon can be reached at hsimon@usc.edu.

All speakers must disclose to the audience any proprietary, financial or other personal interest of any nature or kind, in any product, service, source and/or company, or in any firm beneficially associated therewith that will be discussed or considered during their presentation. The Herman Ostrow School of Dentistry of USC does not view the existence of these interests or uses as implying bias or decreasing the value to participants. The Herman Ostrow School of Dentistry of USC, along with ADA CERP, feels that this disclosure is important for the participants to form their own judgment about each presentation.

This course is one of three in the successful series of Esthetic Full-Mouth Implant Reconstruction offering a comprehensive review of this treatment modality. It will expose you to a larger variety of patients with challenging conditions to enrich your experience in this field. You may take each module separately, but we encourage you to take all modules to maximize your learning experience and fully comprehend this treatment modality.

Complete Course:

- ☐ **Modules I, II & III (July 21, 22, and 23, 2017)**
Before June 15, 2017: Dentist \$1,995; Auxiliary \$1,695
After June 15, 2017: Dentist \$2,245; Auxiliary \$1,910

- ☐ **Module I: Lecture (Friday, July 21, 2017)**
Before June 15, 2017: Dentist \$295; Auxiliary \$250
After June 15, 2017: Dentist \$375; Auxiliary \$320

- ☐ **Module II: Lecture (Saturday, July 22, 2017)**
Before June 15, 2017: Dentist \$295; Auxiliary \$250
After June 15, 2017: Dentist \$375; Auxiliary \$320

- ☐ **Module III: Hands-On (Sunday, July 23, 2017)**
Before June 15, 2017: \$1,875
After June 15, 2017: \$1,995
* Lunch provided

*Fees include course material,
continental breakfast and
refreshments during breaks.*
