

Core Skills: ENT Facial Plastic Surgery

Saturday 16 November 2019

The Core Skills: ENT Facial Plastic Surgery Workshop will provide ENT and Plastic Surgery trainees with increased operative experience and the opportunity to consolidate knowledge and skills in a range of techniques in facial plastic surgery. This hands-on cadaveric workshop will reinforce knowledge of anatomy and provides the opportunity to practise a range of facial plastic procedures not commonly performed by trainees in clinical practice.

Hands-on dissection and pairing of participants of similar skill levels enables discussion and group learning under expert supervision.

The sessions are fully interactive with a high ratio of knowledgeable faculty to participants. Faculty provide superior training and immediate feedback in a practical and controlled workshop environment. Limited positions are available for Observers and Theatre Nurses in the role of assistant.

CTEC acknowledges the support of the following:

Government of Western Australia
Department of Health

Medtronic

Convenor

Mr Tuan Pham

Co-Convenor

Mr David Gillett
