ABOUT THE ORGANIZERS

Negeri Sembilan Emergency & Trauma Society (NSETS)

From humble beginnings in 2015, NSETS has grown into the largest organization in Negeri Sembilan dedicated for Emergency Medicine practitioners. NSETS seeks to unite the 7 hospitals in Negeri Sembilan, as well as caring for the hundred's employees across the state.

NSETS has actively supporting courses and training such Pediatric Made Easy (PEM), Negeri Sembilan Trauma Life Support (NSTLS) and even nonclinical sectors such as futsal, netball, bowling and others. We are involved in both government and private sectors, making us the largest organization for emergency medicine practitioners in Negeri Sembilan.

Paediatric Emergency Medicine (PEM) Malaysia

PEM Malaysia is at the forefront of providing specialized care for children in Malaysia during their most critical moments. Comprising dedicated healthcare professionals with subspecialty training in Paediatric Emergency Medicine , PEM Malaysia is committed to ensuring that every child in need receives the highest quality emergency medical attention.

With a focus on paediatric emergency medicine, we strive to enhance the knowledge, skills, and resources available to healthcare practitioners dealing with paediatric emergencies.

Through education, research, and collaboration, PEM Malaysia continually advances the field of paediatric emergency medicine in Malaysia, ultimately improving the outcomes and well-being of our nation's young patients.

ABOUT THE EVENT

SAVING LIVES: ONE PIXEL AT A TIME

PEM Made Easy 3.0 aims to promote multidisciplinary networking to bridge the gap in paediatric emergency medicine development by sharing experience and combining expertise. The two-day conference with numbers of pre and post congress workshops intended to provide healthcare professionals with a comprehensive understanding of the unique challenges and considerations in paediatric emergency medicine.

Comprehensive chapters and symposia on a broad range of paediatric emergency medicine topics are scheduled to prepare healthcare professionals to excel in the field of paediatric emergency medicine and provide the best possible care to young patients in need. This annual event also provides delegates with the opportunity to interact and build a network with their peers, mentors and industry partners.

OBJECTIVES

- I. To provide a comprehensive understanding of the challenges and considerations in pediatric emergency medicine to all healthcare providers.
- II. To increase participants' knowledge about common clinical presentation and the appropriate approach to obtain a diagnosis.
- III. To teach participants how to perform a thorough and age-appropriate assessment of pediatric patients, including vital signs and physical examination.
- IV. To increase participants' confidence when dealing with seriously ill or injured children and ensure they can recognize life-threatening conditions quickly.
- V. To educate participants about the principles of child resuscitation.
- VI. To familiarize participants with the pharmacology aspects of pediatric emergencies regarding medication, including the correct and appropriate dosage and administration of medication.
- VII. To teach participants how to evaluate pediatric diagnostic imaging, such as X-ray and ultrasound, in an emergency situation.
- VIII. To emphasize the importance of effective communication and collaboration with children's specialists, their families and other members of the health care team.
- IX. To introduce participants to the latest guidelines and evidence-based practices in pediatric emergency medicine.
