Payment in full is due with registration and there is a non-refundable cancellation fee of \$50. There will be no refunds given within 2 weeks (14 calendar days) of the course.

Great Lakes Seminars reserves the right to cancel the course due to unforeseen/unavoidable circumstances. In the event of a cancellation, Great Lakes Seminars will not be responsible for any charges incurred by the registrant other than the course cost.

Instructor

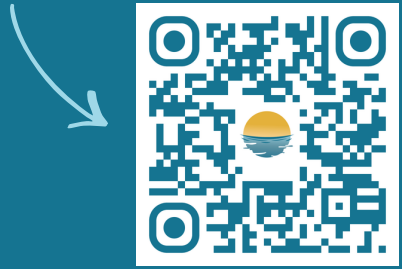

Ashwin Datt
PT, DPT, CIMT, FAFS, FMR, FGS
Ashwin graduated from San Francisco State University with a degree in kinesiology with an emphasis in human movement studies in 2003. He continued to the University of the Pacific to finish his doctoral degree in physical therapy in 2007. Ashwin's primary focus is outpatient orthopedic and rehabilitative physical therapy, specializing in the treatment of a wide variety of injuries, surgeries and pathologies. He emphasizes a whole-body approach when treating patients. Ashwin started his Great Lake Seminars journey in 2008 and achieved his certification in Integrated Manual Therapy (CIMT) in 2010. Since then, he has assisted many courses for GLS and is excited for his role as a lead instructor. When he is not in the clinic, Ashwin enjoys spending time with his family, hiking, surfing, snowboarding, golfing, gardening and being outside.

- The GLS Experience**
Be part of a fun weekend that will fly by

Advanced Manual Therapy Techniques for the Extremities

Course Description

Feeling like you want to add more skills to your extremity treatment toolbelt? Then this is the perfect course for you. You'll learn techniques for the difficult extremity patient, who doesn't respond well to normal treatments or comes in with a dysfunction you haven't encountered before. We'll focus on truly unique joint mobilizations and myofascial release techniques, along with retraining exercises that will help you maintain the improvements you gain in the clinic. These techniques are the "clinical pearls" we have picked up over the years that helped us get extremity patients better when traditional treatment didn't work.

As with all our manual therapy courses, this course is at least 75% hands-on lab, and will give you skills you can use immediately upon returning to the clinic!

Course Objectives

- Correctly and independently state the anatomy and physiology behind a joint cavitation
- Correctly and independently identify and palpate 5 specific joint dysfunctions
- Correctly and independently identify and palpate 5 specific myofascial dysfunctions
- Correctly and independently perform 5 upper quarter mobilization/MFR techniques
- Correctly and independently perform 5 lower quarter mobilization/MFR techniques
