WEBINAR

#7323 Pediatric Sensory Systems Effect on Developmental Behaviors and Function

Instructor:

Marti Smith, OTR/L

Audience:

Physical Therapists, Occupational
Therapists and Assistants

Delivery Options:

Live Webinar or Self-Study Options

Motivations, Inc.

SUMMARY: In this two-hour webinar the presentation will discuss how the Sensory system processing and integration differences can lead to a need to difficulty participating in activities of daily living. With sensory system, development can become abnormal and lead to problematic behaviors and coping strategies. Learn ways to improve movement patterns and daily function. Course instruction methods include lecture, demonstration, videos, case studies and question/answers. (Introductory Level)

PRESENTER: **Marti Smith, OTR/L** has been a practicing occupational therapist in school systems, private practice, Birth to Three, and geriatric rehabilitation for over a decade. Ms. Smith graduated from Indiana University in 1996. Her specialties include Autism, Handwriting, and providing creative, quality care while working in low-income demographic areas. Her passion is for creative problem-solving using minimal resources. Her courses provide ideas to keep treatment sessions innovative, interesting, and fun. She has published a how-to book on making inexpensive rehab equipment with PVC called "[PVC for Rehab Professionals](#)". She has been a national speaker since 2002 and credits countless attendees with many of the ideas referenced in her courses. Marti is gifted in public speaking and presenting large quantities of useful information in an entertaining and fun way. She enjoys gathering information and helping other therapists organize it into practical and useful resources. Check the workshops link to see her current offerings. Marti is certified in Therapeutic Listening, Interactive Metronome, CiSM, Athletic Training, and Massage Therapy. *Financial*— Received a teaching honorarium from Motivations Inc. *Nonfinancial*— No relevant nonfinancial relationship exists.

OBJECTIVES: Upon completion of this course, the participant will be able to:

1. Identify at least 2 developmental experiences that will cause the sensory system to dysregulate.
2. Identify how the sensory system develops and list 3 ways in which the development can become abnormal and lead to problematic behaviors and coping strategies.
3. Name at least 3 intervention strategies to improve participation in play and self-care activities.
4. Name 2 movement patterns which improve sensory functioning.

FORMAT: This is a 3-contact hour course equivalent to 3 CEU's or 0.3 CEUs offered as a live webinar or self-study. Instructors present the live course content via an internet website displaying real time power points. Learners will receive a course instruction link. Instructors lecture through livestreaming internet on your computer. Questions may be asked during the webinar using the chat feature or the "raise hand" feature for live discussion.

PT CEU's: Motivations Inc is an approved provider of Physical Therapy continuing education by these professional bodies: Texas Chapter of the American Physical Therapy Association, ILDPR- Illinois Department of Professional Regulation Approved PT CE Sponsor, NY- New York State Education Department, Office of the Professions. Physical Therapy Board of California. Many state boards recognize these for pre-approval purposes. Contact us if you would like verification a state.

This Live and Distance Learning—Interactive and Distance Learning—Independent and Blended/Hybrid activity is offered at 0.3 CEUs **Introductory-Level**, Occupational Therapy Service Delivery, Foundational Knowledge. The assignment of AOTA CEU's does not imply endorsement of specific course content, products or clinical procedures.

AGENDA:

Pre-Study: 30 Minutes Plan to read the course materials, references and review the post test before the start time. Please be prepared to share patient case study and related question during the discussion time.

- 30 min: Overview of brain and sensory system development
- 30 min: Ways that specific developmental experiences shape the brain and sensory system
- 30 min: Case studies will be shared and recommendations shared throughout this portion of the course
- 30 min: Movement patterns and various theories that work well to improve sensory functioning.

Post-test: 30 Minutes Research, identify, and submit your post test question answers on the online form. This is an open book test you can take multiple times if needed to obtain the 70% score. Complete the evaluation feedback survey and needs assessment. Obtain, review and save your auto-emailed certificate for your files.
