Dear Colleagues,

We are proud to invite you to the 6th Endometriosis League Congress, which will be held in the world famous city of **Bordeaux in France, June 15<sup>th</sup>-17<sup>th</sup> 2022.**

This congress gathers not only surgeons, but also all the healthcare providers who have to deal with endometriosis (gynaecologists, fertility specialists, radiologists, biologists...), and need to work together but are not always aware of how things are done by the others: mixing our knowledges is one of our aims, and sessions will be organised by major topics (surgery, fundamental science, research, fertility, imaging, medical treatment, global management...).

After the great success of Prague in June 2019, we wish to continue having exciting live surgeries showing new techniques, debates about older ones, and also learn more about medical treatments and methods of diagnosis.

The meeting will provide great opportunities for networking and sharing the latest research and news about innovative technology. Corporate partners and sponsors of EEC Bordeaux 2022 will be able to meet congress delegates face-to-face and establish important and meaningful relationships.

**We hope you can join us in Bordeaux for this ground-breaking event and look forward to your partnership and support.**

**Horace ROMAN**  
EEC 2022 CONGRESS PRESIDENT

**Harald KRENTEL**  
EEL PRESIDENT

## → ABOUT EEL

Endorsed by  SCGP  
Société de Chirurgie Gynécologique et Pédiatrique

**The European Endometriosis League (EEL)** has two main goals. Our aim is to extend public awareness and support scientific research in the field of Endometriosis and other co-existing gynecological conditions.

To achieve these goals, we have built a European board of medical experts on Endometriosis (EEIC: European Endometriosis Information Center). Furthermore, we are conducting scientific meetings, seminars, educational programs, congresses, research projects and serve as a frame for patient self-support groups.

The results of our research projects are published in scientific journals and thus brought to the public's attention. Renowned physicians founded the EEL in 2005. So far we are active in several different European countries and are currently extending our activities into additional countries.

The EEL is supported and financed through membership fees, donations and an advisory board of the medical industry.
