Dear Healthcare Professional,

It gives me great pleasure to present to you the official programme for the **12th Middle East Orthopaedics Conference**, taking place on **25-26 January 2016** at the Dubai International Convention and Exhibition Centre.

Last year we tackled 'the knee', and delivered insights into the development and treatment of the knee from birth to death. The 2016 agenda continues in this trend with a new focus on 'the shoulder'. Some of the themes you can look forward to include: anatomy and function, shoulder development, shoulder trauma, rotator cuff and facets of shoulder instability. With an expert speaker faculty comprising of world renowned Orthopaedics, sports medicine, physiatric, and physiotherapy experts the two-day agenda will highlight the very latest in: surgical techniques, non-operative care, rehabilitation procedures, and the most recent advancements in treatment of shoulder conditions across a lifespan.

Do not miss this must-attend industry gathering, I look forward to welcoming you to this major educational event.

Yours sincerely,

Dr William D. Murrell
