35th POLITZER SOCIETY MEETING

Welcome Message

Dear colleagues and friends,

On behalf of the Korean Otological Society, we are pleased to announce that the 35th Politzer Society Meeting (Politzer 2026 Seoul) will be held in Seoul, Korea on November 4~7, 2026.

As we are scientists, scholars, and artists in hearing and balance, regardless of the stage in our careers, we value the significance of what we have learned personally from our patients as well from the accumulated knowledge and skills through the sharing our basic and clinical research. It is through these communications and collaborations that we can advance otologic science and clinical care globally. Politzer 2026 Seoul meeting will serve as a perfect platform by offering invaluable insights into the latest advancement in our subspecialty. The theme "Dedicated to Healthy Ears for All Mankind" reminds us of the role of Politzer Society to succeed the spirit of Adam Politzer to our next generation, and this will eventually benefit our patients, their loving family and all mankind in the whole world.

The venue, Dragon City, is in the center of old town of Seoul, where culture and tradition coexist harmoniously with the amenities of modern technology and conveniences. Dragon City is easily accessible from Incheon-Seoul airport and will provide comfortable accommodation for Politzer participants. The venue is ideally located for both learning and convenient access to many cultural sites and dining options for social interactions.

We are excited to welcome all the distinguished speakers, attendees, and sponsors who join this festival from around the world.

Please save the date and plan for the meeting. We look forward to seeing all of you in Seoul in November 2026.

Ja-Won KOO

President

Jae-Jin SONG
