15th Annual International Symposium on MELANOMA and Other Cutaneous Malignancies®

Overview

Now in its 15th year, the **International Symposium on Melanoma and Other Cutaneous Malignancies®** is a 1-day educational conference, revolutionizing the presentation of emerging therapies and evolving standards of care in the management of your patients with melanoma and other skin cancers.

World-renowned experts Omid Hamid, MD, and Jeffrey Weber, MD, PhD, will lead this international symposium to provide you the tools you need to personalize care for your patients. Presentations will cover current advances in immunotherapy and targeted therapies, the benefits of regional therapy, how to use predictive and prognostic modeling, how to manage treatment-related adverse events, and more.

Join us in New York, and together, we'll meet the challenges currently facing the field!

Benefits to Attending this Meeting:

- Learn how immunotherapy combinations will change your practice
- Explore new frontiers and new targets to treat melanoma
- Update your strategies to mitigate treatment-related toxicities
- Interact with the experts faculty and colleagues
- Expand your network of colleagues and peers
