

TRANSLATING SCIENCE INTO CLINICAL PRACTICE

4TH ASIA PACIFIC AIDS & CO-INFECTIONS CONFERENCE

HONG KONG • 27 - 29 JUNE 2019

APACC highlights and addresses the challenges in combating and controlling the HIV and co-infection epidemics in the Asia-Pacific region, home to more than half the world's population.

By bringing together national, regional, and international experts and connecting countries from across the resource spectrum, this conference places an emphasis on new research findings, treatment guidelines, policy, and addressing stigma and discrimination, particularly among vulnerable populations. We aim to empower regional healthcare providers, community representatives, and others involved in championing the rights of people living with HIV and related co-infections through building knowledge and understanding to achieve successful responses to these pandemics.

PROGRAM COMMITTEE

Charles Boucher
MD, PhD
Erasmus Medical Centre, the Netherlands

Mark Boyd
MD, FRACP
Lyell McEwin Hospital, University of Adelaide, Australia

Thuy Le
MD, DPhil
