Agenda

Day 1 | Saturday, October 19

Welcome and Introductions
7:30 AM–7:45 AM

Anatomy and Physiology
7:45 AM–9:15 AM

- Review the anatomy, structure, and function of the skin and underlying tissues
- Describe the overlapping stages in wound healing, and the critical factors in each stage

BREAK | 9:15 AM–9:30 AM

Peripheral Arterial Disease
9:30 AM–10:20 AM

- Review the pathophysiology of arterial disease
- Describe diagnosis, management and interventions for treatment

Chronic Venous Insufficiency
10:20 AM–11:10 AM

- Describe the pathophysiology of chronic venous insufficiency and the resulting ulcerations
- Discuss the comprehensive management of the chronic venous insufficiency patient including compression and potential interventions

Lymphedema
11:10 AM–11:40 AM

- Describe the pathophysiology of lymphedema and the associated related disease states
- Identify specific short- and long-term management strategies for the patient with lymphedema

Assessing the Evidence
11:40 AM–12:00 PM

- Review the terminology related to evidence in healthcare and specific to wound care studies
- Discuss the relationship of clinical trials and application to clinical practice

LUNCH | 12:00 PM–1:00 PM

WCPC Benefits

✓ Convenience of taking the exam on-site after the course (optional)*

✓ Improves your chances of passing the CWCA®, CWS®, or CWSP® board certification exam

✓ Improves patient outcomes

✓ Certification lasts 10 years

✓ Earn 17 CMEs/CEs/CECHs

✓ Only recommended course by the ABWM Foundation

✓ Time-saving 2-day format

✓ Cost-efficient price

*You must submit your completed exam application, separate payment, reference letters, and all documentation to the American Board of Wound Management by the exam application deadline in order to schedule your certification exam after the WCPC course. There is limited availability so please submit your completed application as soon as possible.

Pressure Injuries/Ulcers
1:00 PM–2:30 PM

- Review the epidemiology, pathogenesis, and stages of pressure ulcers
- Outline specific interventions for pressure ulcer prevention and management of pressure, shear, friction, and microclimate

Burns
2:30 PM–3:00 PM

- Review burn types based on the mechanism of injury
- Determine the best course of treatment for optimal outcomes in patients with burns

BREAK | 3:00 PM–3:15 PM

Diabetes and Diabetic Foot Ulcers
3:15 PM–4:15 PM

- Describe the metabolic and neuropathic changes associated with diabetes
- List interventions related to specific diabetes-related foot problems

Atypical Wounds
4:15 PM–5:30 PM

- Recognize the importance of an accurate diagnosis of atypical wounds
- Identify the clinical presentation of many atypical wounds and some associated treatment interventions

Day 2 | Sunday, October 20

Assessment and Documentation
7:30 AM–8:15 AM

- Define the fundamental elements of a holistic evaluation of the patient with an open wound
- List the key components of a thorough wound assessment and recommendations for accurate documentation

Nutrition
8:15 AM–9:00 AM

- Discuss nutritional factors and the underlying deficiencies that impact wound healing
- Employ strategies to improve a patient's wound healing with protein supplements, vitamins, minerals, and alternate feeding methods

BREAK | 9:00 AM–9:15 AM

Assessment and Management of Bioburden
9:15 AM–10:45 AM

- Describe the impact of the presence of bacteria on open wounds
- Review the clinical and laboratory methods of assessing the presence of bacteria in open wounds
- List the interventions available for topical management of bioburden in wounds

Hyperbaric Oxygen (HBO)
10:45 AM–11:15 AM

- Discuss the use of HBO therapy in chronic wound care
- Describe therapeutic use, indications, and contraindications of HBO therapy in wound healing

Psychosocial
11:15 AM–11:45 AM

- Summarize psychological considerations on wound healing including pain, immobility, cognition, learning style, palliative care, family support system, and adherence
- Relate the psychosocial and cognitive aspects to patient outcomes in wound repair

LUNCH | 11:45 AM–12:45 PM

Debridement
12:45 PM–1:45 PM

- Relate the impact that wound debridement has on the preparation of the wound for healing
- Describe the options for debridement of chronic wounds

Topical Management
1:45 PM–3:00 PM

- Describe the steps in designing a topical treatment plan for the patient with a wound
- Discuss the importance of adequate wound cleansing
- Relate the topical wound dressings to the needs of the wound
- Discuss advanced technologies including negative pressure wound therapy, growth factors, and cellular- and tissue-based products

BREAK | 3:00 PM–3:15 PM

Biophysical Agents
3:15 PM–3:45 PM

- Describe complimentary/adjunctive electrotherapeutic interventions that facilitate wound healing
- Review the use of electrical stimulation, high- and low-frequency ultrasound, light therapy, and pulsed lavage with suction in treatment of open wounds

Test Taking Strategies
3:45 PM–4:15 PM

- Engage in a highly interactive review of the course content using multiple choice questions and photographs of different types of wounds for process questions and answers

Practice Exams and Wrap-Up
4:15 PM–5:30 PM
