ECAMS

COURSE CONTENTS

Foundations of Facial Aesthetics & Upper-Face Botox

- Facial assessment, consultation and patient selection
- Applied facial anatomy: muscles, vessels and nerves
- Botulinum toxin pharmacology, formulations and safety
- Treatment of forehead lines, glabellar lines and crow's feet
- Eyebrow positioning, symmetry and natural facial expression
- Ultrasound-assisted muscle assessment and AI facial analysis
- Live demonstrations, supervised practice and complication prevention

Advanced Neuromodulation & Skin Rejuvenation

- Advanced Botox applications: gummy smile, chin, masseter, platysmal bands and hyperhidrosis
- Ultrasound-assisted muscle mapping and AI-based dynamic facial analysis
- Chemical peeling: agents, indications, skin typing and complication prevention
- Platelet-Rich Plasma (PRP): preparation, applications and clinical evidence
- Mesotherapy and skin boosters: product selection, indications and safety
- Combination-treatment planning and patient-specific protocols
- Practical workshops, aseptic techniques and complication recognition

Hyaluronic Acid Fillers, Facial Anatomy & Vascular Safety

- Facial aging, volume restoration and aesthetic proportions
- Hyaluronic acid filler properties and product selection
- Lip enhancement, nasolabial folds, marionette lines and cheek restoration
- Facial vascular anatomy and ultrasound Doppler mapping
- AI-assisted facial assessment and digital treatment planning
- Filler complications, hyaluronidase principles and emergency management
- Live demonstrations, supervised practice and emergency simulation

Full-Face Rejuvenation, Ultrasound & Practice Development

- Advanced facial analysis, profile assessment and treatment planning
- Chin, jawline, midface and full-face rejuvenation
- Complex anatomical regions and high-risk procedure assessment
- Ultrasound-assisted filler evaluation and complication management
- Vascular occlusion recognition and emergency response
- Aesthetic clinic establishment, licensing and clinical governance
- Financial planning, treatment costing, pricing and profitability
- Ethical marketing, brand development and patient retention
- AI applications in clinic operations, digital consultation and marketing
- Practical clinic business planning and final assessment

ELIGIBILITY

“Licensed medical and dental professionals eligible to perform the relevant procedures within their professional scope and local regulations.”

ADVANCE YOUR CLINICAL EXPERTISE. REFINE YOUR SKILLS. ELEVATE YOUR AESTHETIC PRACTICE.

We will provide all necessary clinical protocols and course materials, alongside complimentary lunch and refreshments daily during the training.
