**ADVANCED
PRACTICE
SEMINARS**
www.APS4DDS.com

Are you prepared for a crisis situation that can occur at any time?

From handling a medical emergency to deciding on an alternative treatment plan when cases take an unexpected turn, attendees benefit from courses presented by Daniel G. Pompa, DDS.

An Oral and Maxillofacial Surgeon, Dr. Pompa shares new and proven clinical approaches while expanding problem solving and analytical skills. He delivers high energy, interactive, multimedia presentations. Attendees will gain insight into the decision making process by reviewing multiple case history scenarios as well as a hands-on workshop with his Medical Emergency course.

Dr. Pompa uses this approach across a wide spectrum of topics, based on 30 years of experience as an Oral and Maxillofacial Surgeon. Concepts and methods presented are supported by a thorough review of the most recent evidence-based dental and medical literature.

With guidelines and principles that will broaden your situational awareness, both surgically and medically, participants understanding, confidence and patient outcomes can improve.

"An outstanding lecture that is brilliantly presented."

M. Rothberg, DDS; Long Island, NY

Medical Topics

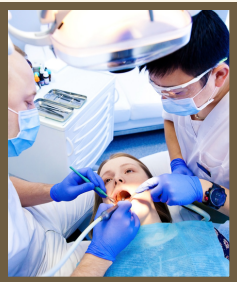

**Actions and Algorithms for Medical Emergencies:
*How to Save a Life (Including Your Own)***

The "Top 10 List" for Essential Drugs in the Emergency Drug Kit

The Role of the Dental Professional in the Treatment of the Diabetic Patient

Surgical Dental Topics

To Pull or Not to Pull: *Periapical Surgery vs. Implant Replacement*

The Single Tooth Implant: *The Ultimate Esthetic Challenge*

**Updates on Implantology and Prosthetics:
*From the Surgeon and General Dentist's Perspective***

Advanced Practice Seminars

Daniel G. Pompa, DDS

516.287.0917 | www.aps4dds.com | dpompa@aps4dds.com

Expand the learning in the following areas of focus:

The “Top 10 List” for Essential Drugs in the Emergency Drug Kit

Today there are more medically compromised patients being treated in our offices than ever before. As a result, a more detailed medical history and medical evaluation should be taken prior to beginning treatment.

This seminar will describe the essential drugs needed to create a medical emergency kit for your office. In addition, we will discuss three basic tests that can easily be performed to help in the physical diagnosis of a patient's medical status.

We will also discuss the “Conversational History” and how this can pick up many medical issues not revealed by the standard health history form. This can be performed by the dentist or staff and can prevent many potential medical emergencies from occurring.

Learning Objectives:

- Easily recognize and manage the most frequent life threatening emergencies
- Implement three simple chair-side, non-invasive tests, to help avoid an emergency
- Determine when to administer the essential “Top 10” emergency drugs
- Utilize a systematic approach for each emergency depicted on color-coded cards

The Role of the Dental Professional in the Treatment of the Diabetic Patient

As the prevalence of diabetes continues to increase in the United States, so too will the number of dental patients affected by the disease. Almost one third of our senior population will develop Diabetes. One out of three of these seniors will be undiagnosed. This lecture is specifically geared for the Dentist and Dental Hygienist.

This presentation addresses the relationship between oral health and diabetes and will discuss the practitioner's role with management considerations for the patient with diabetes. An overview of diabetes will be discussed as well as its oral manifestations, consequences, and treatment recommendations.

Learning Objectives:

- Define diabetes and differentiate between each type
- Review the role the Dentist and Dental Hygienist have in early detection for the diagnosis of diabetes
- Describe the signs and symptoms of uncontrolled diabetes mellitus
- Identify the risk factors and systemic complications of diabetes
- Discuss the oral complications and management considerations for the dental patient with diabetes

Suggested Formats: Partial Day, Lecture

Suggested Attendee: All Health Professionals and Teams

Daniel G. Pompa, DDS

To Pull or Not to Pull: Periapical Surgery vs. Implant Surgery

What alternative treatment options should be considered when a restorative and/or endodontic failure occurs?

Advancements in delivering periapical surgery have resulted in success rates that can be equivalent to implant replacement when certain guidelines are adhered to. Periapical surgery as an adjunct to endodontic treatment is a proven approach. With the introduction of new surgical techniques and a systematic method to the diagnosis and treatment of compromised teeth, the clinician should be able to more accurately determine the long term prognosis for these treatment options.

Evaluate treatment options with an evidence-based approach when a tooth is ailing or failing. This course will describe the indications and contraindications for performing or referring a patient for apical surgery. With a specific 7 step workup, including a correct history, radiographic and clinical evaluation, the decision to perform an apicoectomy will be weighed against further evaluation, a re-treatment option, or extraction and replacement with an implant (immediate or delayed). As a result, a decision is more accurately made as to whether an implant or a fixed bridge (fixed partial prosthesis), a removable prosthesis (fixed or transitional temporary prosthesis), or other options would be the final treatment plan discussed with the patient.

Learning Objectives:

- Learn the radiographic technique to use when evaluating a tooth for a fracture
- List the 7 step work-up, consisting of procedures and tests that should be used when performing or referring a patient for an apicoectomy
- Understand the principles of guided tissue regeneration, and know the indications and contraindications for its use
- Recognize how the location of a sinus tract can be a key critical diagnostic indicator for the final prognosis
- Identify the signs to differentiate between an Endo/Perio vs. Perio/Endo lesions and understand the difference as it relates to the final prognosis

Multiple Lecture Formats: Full or Partial Day; Evening

Suggested Attendee: General Practitioner & Dental Specialists

"Excellent presenter, great world of knowledge and experience. Relevant and interesting."

Dr. Florence Certo
Staten Island, NY

"Dr. Pompa is very energetic and informative and clarified several misconceptions regarding diagnostic and treatment planning. Very worthwhile course to take."

Dr. Eric Weinberg
South Orange, NJ

"I learned so many 'take home' ideas to put to immediate practice."

Dr. Jerome Gliksberg
Succasunna, NJ

"One of the best CE courses taken lately."

Dr. Jason Seo
Wayne, NJ

"Great. Brilliant course."

Dr. Naim Sylvester
Totowa, NJ

The Single Tooth Implant: *The Ultimate Esthetic Challenge*

The single tooth implant may be one of the most difficult challenges dentists face, with possible unforeseen outcomes.

The past few years have brought a paradigm shift, as guidelines for the surgical and restorative approach have changed dramatically. Fine tune your workup to create a result that is as close to a natural replacement as possible. We will focus on the latest advances incorporating evidence-based data. Participants will review a unique sequential treatment planning approach which can result in successful outcomes.

Emphasis will be given to the use of 3D treatment planning as it relates to the diagnostic workup and the use of computer guided surgery.* Multiple provisional options and/or interim Hawley prosthesis appliances will be reviewed to attain ideal esthetic results. Long term follow-up will be shown as it relates to these approaches.

Learning Objectives:

- Explore the use of platform switching and when and where to use it
- Identify the "Top 10" rules for a successful esthetic outcome
- Determine when to use immediate vs. delayed placement of implants
- Understand the principles of CT guided treatment planning
- Describe multiple provisional options for maximizing esthetic results

Multiple Lecture Formats: Partial Day, Evening

Suggested Attendee: General Practitioner & Dental Specialists

"Everyone enjoyed your presentation and I have received only glowing reviews."

Jim Apitauer, DDS
Clinical Assistant Professor
New York University

"Dr. Pompa is the ultimate lecturer who keeps you focused on the information, and who simplifies the complexity of the problem so that the answer will always remain with you. He is one of the most intelligent and impressive doctors I know."

Andrew Gershon, DDS

"The useful information presented by Dr. Pompa far exceeded, my already high, expectations. I would enthusiastically recommend this program to all my colleagues."

Daniel Fink, DDS
Forest Hills, NY

Update on Implantology and Prosthetics: *From the Surgeon and General Dentist's Perspective*

Presented by Dr. Dan Pompa and Dr. Arthur Volker

Participants will gain a thorough understanding of how to approach comprehensive treatment planning from different points of view. We will review both surgical and prosthetic clinical pearls for achieving an ideal esthetic outcome. Patient expectations are important to the success of the case. Knowing what they are may not always be what you think. The attendee will also develop a deeper understanding of why complications occur and how to avoid them.

Learning Objectives:

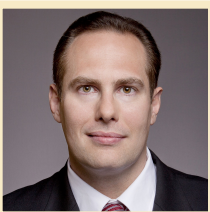

- Review the latest surgical innovations to reconstruct deficient alveolar ridges
- Describe proven methods to increase vertical height
- Understand esthetic requirements to achieve successful results
- Appreciate that the patients and our perceptions are not the same
- Discuss the latest ceramic materials and where and when they should be used

PRESENTER BIOGRAPHIES

Dr. Daniel Pompa is a Fellow of The American Association of Oral and Maxillofacial Surgeons and is also a Fellow of The International Congress of Oral Implantologists. Dr. Pompa has been a guest lecturer at Columbia University College of Dental Medicine, New York University College of Dentistry and the University of Florida College of Dentistry. He has lectured extensively both nationally and internationally and in 2013 became a Seminar Series Speaker/Consultant for the American Dental Association. Dr. Pompa is an author, having published in such journals as JADA and the NYSAGD Journal as well as Dentistry Today where he has been listed as a “Leader in Continuing Education.” Dan is also an inventor, having been issued a U.S. Patent for his innovative work in the field of Dental Implantology.

Dr. Arthur Volker graduated from the Columbia University School of Dental and Oral Surgery. He is the Chairman of the New Dentist Committee and a member of the Continuing Education Committee for the New York State Academy of General Dentistry. Dr. Volker is a Diplomate of the World Congress of Minimally Invasive Dentistry, and is a Fellow of the Academy of General Dentistry and the American College of Dentists. Dr. Volker has published articles and lectures on such topics as cosmetic dentistry, minimally invasive dentistry, dental materials and dental implants.

Daniel G. Pompa, DDS

Things don't always go the way we plan.

From handling a medical emergency to deciding on an alternative treatment plan when cases take an unexpected turn, attendees will benefit from Daniel G. Pompa, DDS's courses. With guidelines and principles that broaden your situational awareness and understanding, participants' confidence and patient outcomes can improve.

Sharing new and proven clinical approaches while expanding problem-solving and analytical skills, Dr. Pompa's highly interactive presentations include multi-media and live demonstrations. Additionally, attendees will gain insight into the decision making process by reviewing multiple case history scenarios.

Dr. Pompa uses this approach across a wide spectrum of topics, in an effort to improve patient outcomes. He consistently receives exceptional reviews and repeat engagements. Content is based on 30 years of experience as an Oral and Maxillofacial Surgeon supported by a thorough review of the most recent evidence-based dental and medical literature.

Dr. Pompa co-established The Oral Surgery and Implant Center in Forest Hills, New York in 1985. After graduating from New York University College of Dentistry, Dr. Pompa completed a GPR at Long Island Jewish Hospital, followed by specialty training in Oral and Maxillofacial Surgery at Lincoln Hospital, New York Medical College. He has earned Fellowship status in both the American Association of Oral and Maxillofacial Surgeons and International Congress of Oral Implantologists.

Outreach/In the Community

- Established the "APS Invitational Open Charity Golf Tournaments" to Benefit U.S. Veterans; American Legion (*multiple years*)
- Freedom Tour (New York City Area); Organizer
- New York City Walking and Concert Tour; Organizer
- New York Classic Film Club; Founder and Host

"It's not often that you get to use 'light hearted' and 'dental office emergencies' in the same sentence, but Dr. Pompa was able to carry it off. Far exceeding the objectives of this course, Dr. Pompa is an outstanding speaker who offered interesting, not-commonly known facts. He is one of the best speakers we've had."

R.K. Rosenberg, DDS
Northern Virginia Dental Society

"Yesterday I had a Dental Assistant who went into a severe allergic reaction with her throat closing. I didn't panic and kept cool knowing I had taken your course in Emergencies and was capable of dealing with it. I activated the Emergency Rescue system you taught and it went by the book. Afterwards her Physician mentioned to her that I had saved her life."

“Your presentation was the best of many medical emergencies courses that I have attended in my over 45 years in the dental profession.”

*Robert N. Smyth, DDS, MS, MPA
Washington, DC*

Testimonials

"This succinct course in how to prevent, recognize, and manage office medical emergencies was relevant, excellent, and extremely well presented by Dr. Pompa. I very highly recommend it to all practitioners. Bravo!"

Irvin Kotkin, MD; Hyde Park, NY

"We really enjoyed your presentation...and the movie songs/trivia! Your program was excellent and I can't imagine not having my team there with me. It doesn't do much good in a real life situation if I'm the only one who knows what to do. Especially if I'm the one having the emergency!"

Cathy Taylor, DMD; Gainesville, FL

"During and after taking Dr. Pompa's course on Medical Emergencies, I realized how easy it is to forget these all important and lifesaving skills. He not only presents the latest emergency protocols, but did so portraying emergency scenarios in a multimedia fashion. This along with audience participation, and the use of live demonstrations, totally engaged all the attendees. I now feel confident should a medical crisis occur in my practice or home. Thank you!"

Frank Peritore, DDS; Brooklyn, NY

"This is one of the most informative and well-presented lectures that I have ever attended. It is apparent that considerable time and effort went into the presentation. The use of classical film clips to illustrate key concepts was both meaningful and inspired. Thank you for your hard work and dedication."

Russel Karmel, DDS; Woodhaven, NY

"Your lecture and delivery was so engaging. By any measure, you are a very effective speaker and educator. Your presentation drew the audience in and held their attention throughout the day. There was never a dull moment and it was a pleasure to hear your humorous stories. It was obvious from the extremely positive feedback we've received that your generosity of both time and talent was greatly appreciated by those in attendance. Thank you for a very valuable experience."

**Cathy A. Graffanti,
Executive Director
Northern Virginia Dental Society**

"After attending Dr. Pompa's course on Medical Emergencies I came back feeling considerably more confident to handle almost anything. Dr. Pompa was able to clearly demonstrate what the medical emergency diagnosis was through the patient's signs and symptoms, and what the treatment should be through the use of movie scenes and popular music. We were also instructed on how to set up our own Emergency Kits using color coding. This should be a required course for all dentists, and their staff, annually."

**Rosanne Puopolo-Carter, DDS
Glen Head, NY**

"This seminar is a fast paced, interactive, hands-on presentation. The live demonstrations add to the realism of the emergency scenarios. The correlation of the music, video portrayals, and entertaining material that Dr. Pompa gives results in a memorable experience, giving useful information you will never forget. A must see for your staff as well."

Robert Graziano, DDS

"This was by far the best CE course I've taken in a long, long time. Your passion and well organized information was only rivaled by your enthusiasm and great knowledge."

Simon Cherif, DDS, Pedodontist; Queens, NY

"In my opinion this performance wins 'The Academy Award'!! This presentation was absolutely fabulous in the detailed and superbly organized material. It captures everyone's attention with an eloquent verbalization of details of the medical emergencies. The visual imagery on the screen is beautifully illustrative from start to finish. This was absolutely a most memorable experience."

Howard Ruderman, DDS

Daniel G. Pompa, DDS

“Awesome seminar. The pairing of the video and music with the emergencies and information enables you to easily remember the material. This is a unique approach that is entertaining as well. A must see for anyone interested in management of emergencies. Take your staff, they will thank you!”

Andrew Jacobson, DDS

"Excellent! Dr. Pompa took a complex topic and made it simple to understand."

*Dr. Tony Corello
Westfield, NJ*

"I learned so many 'take home' ideas to put to immediate practice."

*Dr. Jerome Gliksberg
Succasunna, NJ*

"I would like to thank you for an excellent seminar. It was very informative and filled many gaps in knowledge we all need to address in our offices. You are fulfilling a very important aspect of dental education."

Menachem Darwish, DDS; Queens, NY

"Excellent Lecture. I thought I knew more but this lecture got me thinking about ways to change the way I perceive emergencies and how I act."

Jerry Partrick, DDS; North Virginia Dental Society, VA

"One of the best CE courses that I've taken in 40 years!"

Dr. Roy Brahen; New Jersey

"Dr. Pompa is an extremely thorough and dynamic speaker. His multimedia presentation kept me engaged and helped me retain the information presented. The knowledge I gained was above and beyond what I expected."

Peter Pollina, DDS

"Excellent. Dr. Pompa takes a potentially dry topic and makes it lively and interesting."

Dr. Ken Beckman

"This presentation is special in many ways. The way the information is presented is unique, and its usefulness is without question. Dr. Pompa has a great ability to field a wide array of questions with definitive answers that were easily understandable."

Barry Lerman, DDS

"Dr. Pompa is thoroughly informed and up to date in his presentation. It is organized, documented, and most importantly personalized to allow the attendee to easily remember the material. I would highly recommend this seminar to all dentists and their staff."

Perry Perzov, DDS; Roslyn, NY

"Dr. Pompa is an extremely thorough and dynamic speaker. His multimedia presentation kept me engaged and helped me retain the information presented. The knowledge I gained was above and beyond what I expected."

Peter Pollina, DDS; Queens, NY

"This was the best class that I have attended in years."

Sam Mitschke, DDS; Houston, TX

"This was a perfect presentation from start to finish."

Deborah Zivari, DDS; Forest Hills, NY
