

# SCCT2023 PROGRAM AT A GLANCE

| AI/MACHINE LEARNING                                                          |                   |                   |                 |
|------------------------------------------------------------------------------|-------------------|-------------------|-----------------|
| AI and Machine Learning: Coronary Imaging                                    | Friday, July 28   | 1:15PM - 2:45PM   | Breakout 1      |
| AI and CCT: The future and reality in practice                               | Saturday, July 29 | 10:30AM - 12NOON  | Breakout 1      |
| AI and CCT: Looking broadly and looking forward                              | Sunday, July 30   | 8:30AM - 10:00AM  | General Session |
| CONGENITAL HEART DISEASE                                                     |                   |                   |                 |
| Role of CT imaging in common congenital heart diseases: A practical overview | Saturday, July 29 | 10:30AM - 12NOON  | Breakout 3      |
| Establishing and running a congenital heart disease service: Key principles  | Saturday, July 29 | 3:45PM - 5:15PM   | Breakout 2      |
| CORONARY ARTERY DISEASE                                                      |                   |                   |                 |
| Imaging coronary disease in women                                            | Friday, July 28   | 10:15AM - 11:45AM | General Session |
| A critique of Chest Pain Guidelines                                          | Friday, July 28   | 1:15PM - 2:45PM   | Breakout 3      |
| Ischemia, anatomy, either, neither or both?                                  | Saturday, July 29 | 8:00AM - 9:30AM   | General Session |
| Imagers and interventionalists                                               | Saturday, July 29 | 1:30PM - 3:00PM   | Breakout 3      |
| CT Imaging in prevention                                                     | Saturday, July 29 | 3:45PM - 5:15PM   | Breakout 2      |
| Cardiac CT reporting in 2023: What really matters?                           | Sunday, July 30   | 8:30AM - 10:00AM  | Breakout 1      |
| FUNDAMENTALS IN CARDIOVASCULAR CT                                            |                   |                   |                 |
| Ask Siri: Cardiac CT and current events                                      | Friday, July 28   | 10:15AM - 11:45AM | Breakout 2      |
| Hands-on CCT: Learn how to troubleshoot!                                     | Friday, July 28   | 3:30PM - 5:00PM   | Breakout 2      |
| Introduction to CCT - Bootcamp!                                              | Saturday, July 29 | 8:00AM - 9:30AM   | Breakout 3      |
| The comprehensive CCT program                                                | Saturday, July 29 | 10:30AM - 12NOON  | Breakout 2      |
| GAMES & DEBATES                                                              |                   |                   |                 |
| Kahoot: The last CV imager standing III                                      | Friday, July 28   | 1:15PM - 2:45PM   | Breakout 2      |
| Great debates in cardiac CT                                                  | Friday, July 28   | 3:30PM - 5:00PM   | General Session |
| Team Spirit                                                                  | Saturday, July 29 | 5:30PM - 6:30PM   | General Session |
| GUIDELINES & TRIALS                                                          |                   |                   |                 |
| Major clinical trials in cardiac imaging                                     | Friday, July 28   | 10:15AM - 11:45AM | Breakout 3      |
| A catch up on updates in clinical guidelines and expert consensus documents  | Saturday, July 29 | 10:30AM - 12NOON  | General Session |
| STRUCTURAL HEART DISEASE                                                     |                   |                   |                 |
| Case-based journey into TAVR lifetime management                             | Friday, July 28   | 1:15PM - 2:45PM   | General Session |
| Decision making strategies in mitral interventions                           | Friday, July 28   | 3:30PM - 5:00PM   | Breakout 1      |
| Forgot about us? Right-sided valvular interventions                          | Saturday, July 29 | 8:00AM - 9:30AM   | Breakout 2      |
| Non-valvular structural heart interventions                                  | Sunday, July 30   | 10:15AM - 11:45AM | Breakout 1      |
| TECHNICAL ASPECTS OF CARDIAC CT                                              |                   |                   |                 |
| On the cutting edge: Trending technology                                     | Friday, July 28   | 10:15AM - 11:45AM | Breakout 1      |
| Overcoming the technical challenges in cardiovascular CT                     | Saturday, July 29 | 1:30PM - 3:00PM   | Breakout 2      |
| Team based care and data management                                          | Saturday, July 29 | 3:45PM - 5:15PM   | General Session |
| Technical advances in coronary atherosclerosis imaging                       | Sunday, July 30   | 10:15AM - 11:45AM | General Session |
| VASCULAR                                                                     |                   |                   |                 |
| Vascular CTA: The essentials                                                 | Saturday, July 29 | 8:00AM - 9:30AM   | Breakout 1      |
| Cardiopulmonary evaluation                                                   | Saturday, July 29 | 1:30PM - 3:00PM   | Breakout 1      |
