A *live* HYBRID EVENT THAT GOES BEYOND BORDERS

DEAR COLLEAGUES

IMCAS is honored to be back in person for this hybrid edition of IMCAS Asia taking place at the HNBK International Convention Center in Taipei, the Tongji Hospital of Tongji University in Shanghai, along with live transmissions from two locations in Paris.

IMCAS Asia 2021 is a major rupture in medical learning that combines the in-person experience of our congresses with the livestream technologies of our online activities. The different session formats of this year's program strongly encourage communication and connection, fostering growth for all our community members.

The unmissable Anatomy on Cadaver Workshop is back and broadcast LIVE from Paris. Internationally renowned specialists & experts bring their evidence-based updates on topics like injectables, toxins, lasers, pigmentation, threads, hair restoration, face, breast & body surgery. This edition also introduces brand-new subjects like echographic injections, vascular complications and COVID-19.

Learning opportunities continue outside the sessions during the breaks with the LIVE Talk Show, which takes place at a studio set in Paris. The hosting experts lead more laid-back debates, introducing refreshing angles of controversial topics to further stimulate your brain.

Just like the Talk Show, all the content of the scientific program place special emphasis on interactions. The sessions are therefore presented in various teaching formats designed to promote a dialogue among the speakers and delegates.

We have seen that even in lockdown, exchanging opinions, approaches and perspectives helped deepen the understanding and broaden the knowledge, regardless of the distance. Our collaborations with the prestigious academic societies are an example of growing through reciprocity. The more we learn from each other, the further we advance together in science.

The notion of exchange extends to the exhibition in Taipei and online! Be sure to stroll around the booths or attend the symposia to learn about a company's latest products and developments. This year's symposia take place in Room 4 with a brand-new format. After each symposium, you can request private meetings and further the discussion on site and online.

As you can see, there are many new discoveries to be made. We have seen time and again the significance of interacting and the positive effects it has on learning, so we hope you will join the community to find out what lies in the future of our profession, and to accelerate your practice in 2021.

3 CITIES CONNECTED TO THE WORLD LIVE

A key objective of this hybrid event is to stimulate growth through exchange. The 3 cities highlighted below act as the pillars of the scientific program, with moderators on site in each city leading the discussions and engaging the audience across borders, all of which is broadcast virtually worldwide. We're redefining the notion of hybrid and pushing forward an innovative and interactive learning experience.
