

Delivering High Quality Hospital Data

Data Quality and Clinical Coding for Improvement

Towards Clinically Meaningful Information

Thursday 3 December 2015 Manchester Conference Centre, Manchester

10% card payments discount*
15% Group booking discount**

Chair and Speakers Include:

Sean Brennan

*Independent Consultant in
Healthcare Informatics*
Clinical Matrix

Geraint Lewis

Chief Data Officer
NHS England

Dr Andy Spencer

*National Clinical Lead for Hospital
Specialties*
The Health and Social Care
Information Centre (HSCIC)

Supporting Organisation

The Shrewsbury and Telford Hospital **NHS**
NHS Trust

Delivering High Quality Hospital Data

Data Quality and Clinical Coding for Improvement

Towards Clinically Meaningful Information

Thursday 3 December 2015 Manchester Conference Centre, Manchester

10% card payments discount*
15% group booking discount**

“High quality information will empower the health and social care sector in identifying where new care is needed to meet the needs of local populations. Using data, we can determine what care is working well and what needs to be improved, allowing patients, clinicians and commissioners to compare the quality and efficiency of care in different parts of the country.” Dr Geraint Lewis, Chief Data Officer, NHS England

“We need a very big cultural change around the use of data, data can be a great ally to improve patient safety...the use of data is something I am absolutely determined to embrace in the NHS.. We need to make peer review and data transparency the main engine for change in the NHS” Jeremy Hunt MP, Secretary of State for Health, 2 July 2014

“High quality data will underpin the transformation of the NHS, ensuring that it becomes truly patient centred and clinically led. Collecting and sharing accurate information with providers, commissioners, patients and the public will help to assess safety issues and identify areas where outcomes and patient experience can be improved.” NHS England

“We are currently working to develop the data collected from hospitals to collect a wider range of clinical information” NHS England

This conference focuses on improving data quality and clinical coding to deliver clinically meaningful information that can be used by commissioners and providers to demonstrate quality, patient safety and act as an early warning system for poor or declining performance.

The conference focuses on the quality of hospital data. The conference opens with an update on improving data quality and the role of data as an early warning system to identifying outliers and patient safety concerns and continues with an update on national standards . The conference continues with expert sessions and practical case studies on how organisations are improving clinical coding and data quality including improving clinical ownership to ensure accuracy.

“With the increased focus on quality in the NHS, it’s important that the tools we use to measure it are consistent and accurate. Clinicians have a vital role in ensuring the validity of the data that are used, not only to measure quality but to ensure appropriate payment” Dr Nick Bishop Senior Medical Advisor, The Care Quality Commission

10.00 Chair's Introduction

Sean Brennan *Independent Consultant in Healthcare Informatics Clinical Matrix*

10.10 Using large data sets to improve population health

Geraint Lewis
Chief Data Officer
NHS England

- The future of data for secondary care uses in the NHS
- Opportunities and pitfalls

10.40 The potential of SNOMED CT to improve patient care

Dr Andy Spencer
National Clinical Lead for Hospital Specialties
The Health and Social Care Information Centre (HSCIC)

- History of SNOMED CT
- Development of Specialist Subsets (Report on pilot work)
- Benefits of SNOMED CT for patient care
- Progress on implementation

11.10 Questions & answers, followed by coffee & exhibitions 11.20

11.45 Supporting organisations to improve data quality

Katie Squire
Informatics Programme Manager
University Hospitals Birmingham NHS Foundation Trust

- understanding the purpose of data collection
- tools for improving data quality and coding
- examples of common mistakes in data coding
- using clinical indicators to benchmark for improvement

12.15 Extended Session: Clinical Coding Update: The latest on Coding, Tariffs, HRGs and PbR

Sue Eve-Jones
Director
Professional Association of Clinical Coders UK
Head of Clinical Coding
East and North Hertfordshire NHS Trust

- an update on tariffs, HRG and PbR
- working with clinicians to validate the data
- ensuring coding supports payment by results
- improving the depth and quality of coding
- improving the coding of co-morbidities
- the responsibilities of clinicians and managers in supporting clinical coding

12.50 Questions & answers, followed by lunch & exhibitions 13.00

13.50 Clinician and Clinical Coder Joint Working for Improvement Case Study: Improving Mortality Data and Understanding

Dr Martin Farrier
Clinical Director for Quality & Consultant Paediatrician
with Alison Unsworth
Senior Coder & Lead Coder
Division of Medicine

- clinician and clinical coder joint working to validate the data
- implementing a weekly mortality audit, and generating learning and systematic quality improvements from the problems identified
- identifying and focussing on priority areas for meaningful improvement
- using mortality review to engage clinicians in quality improvement
- the national review of mortality measures: what to expect
- feeding back the results to clinicians to change practice
- a clinical coder perspective

14.30 Improving record keeping and implementing data standards

Jan Hoogewerf
Health Informatics Unit Programme Manager
The Royal College of Physicians, London

- improving data quality
- focusing on improving the quality of Medical Records
- limitations of using secondary clinical data e.g. HES data
- enabling the use of primary data: improving the quality of medical records

15.00 Improving clinical coding and data quality in practice: Case Study

Dr Ira Pande
Consultant Rheumatologist
and Dr Ian Gaywood
Consultant Rheumatologist
Nottingham University Hospitals NHS Trust

- improving clinical coding and data quality in practice: our experience at Nottingham
- ensuring the data is clinically meaningful

15.30 Questions & answers, followed by coffee & exhibitions 15.40

16.00 Data quality and Coding in the paperless NHS

Mr Paul Curley
Chief Clinical Information Officer of IM&T and Consultant Surgeon
Mid Yorkshire Hospitals NHS Trust

- using electronic documentation and electronic patient records
- clinical coding issues for a paperless NHS
- using electronic patient records and clinical information systems to look intelligently at the data and information

16.30 Ensuring Clinical Ownership of Clinical and Costing Data

Andrew Tapp
Consultant Obstetrician
Shrewsbury & Telford NHS Trust

- ensuring clinical ownership of costing data
- the impact of poor clinical coding on trust finances and outlier position
- supporting clinicians with coding and data ownership

17.00 Questions & answers, followed by close 17.10
