COURSE DESCRIPTION

Technology for general surgery is constantly evolving. This course will provide an interactive and comprehensive experience focusing on management and treatment options from a general surgical perspective. The goal of the Cleveland Clinic presents Updates in General Surgery is to provide an atmosphere to foster collaboration, innovation and sharing a cost-effective diagnostic approach for patients with complex general surgery cases involving hernia, breast disease and HPB, as well as bariatric, trauma, colorectal and foregut surgery. We will cover what is new in enhanced recovery protocols and offer interactive sessions consisting of cases and questions and answers. American Board of Surgery (ABS) Maintenance of Certification (MOC) self-assessment credits will be offered. Great refresher course for ABSITE training exam.
